Hi Dillon,

No problem. R04 passed.

Please execute R09.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hello Susan,

I would appreciate it if you could reset the record.

I've been here for a just over 8 hours straight myself so I don't mind stopping for the day.

Thank you,

Sorry, typo. Should be R03 instead of R09 which I corrected below.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Subject: RE: AK - NMVTIS Readiness Testing R06

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Thank you,

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2 GERAEN ERROR ELEMENT AAMVA CODE
99/2 GERAET AAMVA ERROR TYPE
99/2 GERDOC ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10
99/2 GERMTX ERROR MESSAGE TEXT

Still missing:

06/4 VVHUCC VEHICLE USE CLASS CODE (you indicated you are still working on this)
06/4 VVHNAX VEHICLE NUMBER OF AXLES

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63953 DMV00025352

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63953 DMV00025366

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Subject: RE: AK - NMVTIS Readiness Testing

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Hi Dillon,

No problem. R04 passed.

Please execute R09.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hello Susan,

I would appreciate it if you could reset the record.

I've been here for a just over 8 hours straight myself so I don't mind stopping for the day.

Thank you,

Sorry, typo. Should be R03 instead of R09 which I corrected below.

Thanks,

Susan Creighton / 703.908.5893 office

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,

Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,

Susan Creighton / 703.908.5893 office

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,

Susan Creighton / 703.908.5893 office

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

o VIN (VVHIDN) from the NT message

o SOT (VTIJUR) from the NT message

o Title Number (VTINUM) from the NT message

o The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message

o The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message

o See Appendix A for remaining NCB and MEC (02/3) block settings

o Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Thank you,

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1

OWNER 2nd occurrence starts in position 39 and should start in 58

OWNER 3rd occurrence starts in position 74 and should start in 112

OWNER 4th occurrence starts in position 109 and should start in 166

BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103

BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104

BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences.

Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to "00" for "None (not in use)" if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska's intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.

I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate. Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter

06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I've addressed all other issues. I'll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use “01”.

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number ‘5061805’ for no GEROUT errors, and ‘5061804’ for a correctly formatted non-active title warning, I would greatly appreciate it.

Thank you,

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will "always" send the VVHVIJ and that really should be "sometimes" as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2 GERAEN ERROR ELEMENT AAMVA CODE

99/2 GERAET AAMVA ERROR TYPE

99/2 GERDOC ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2 GERMTX ERROR MESSAGE TEXT

Still missing:

06/4 VVHUCC VEHICLE USE CLASS CODE (you indicated you are still working on this)

06/4 VVHNAX VEHICLE NUMBER OF AXLES

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences.

Also you have AI just after the brand date which does not belong there.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10

06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.

06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color

06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1

06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number

30/6 VLHNAM LIENHOLDER - added lienholder

30/8 VLHADD LIENHOLDER ADDRESS - added lienholder

34/1 VOWNAM OWNER NAME - added additional owners

Code changes.

06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping

06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping

06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping

26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.

Document ID: 0.7.1187.63952 DMV00025464

30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE

37/1 VBRCOD BRAND CODE (2 occurrences)

37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.

26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.

06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE

30/6 VLHNAM LIENHOLDER NAME

30/7 VLNDAT LIEN DATE

30/8 VLHADD LIENHOLDER ADDRESS

34/1 VOWNAM OWNER NAME (4 occurrences – I got 1 but need 4)

37/1 VBRDCD BRANDER CODE

37/1 VBRCOD BRAND CODE (2 occurrences)

37/1 VBRDAO BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1 VOWNAM OWNER NAME

Thanks,

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both

2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both

1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

ERROR REPORTS

IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY

NMVTIS TITLE HISTORY

NMVTIS THEFT INQUIRY

NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same “Send IU” code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!

And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not. David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.

- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

Subject: RE: AK - NMVTIS Readiness Testing

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this “NMVTIS Menu”. There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an “AAMVA Menu”, which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the “NMVTIS Menu”.

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,

Subject: RE: AK - NMVTIS Readiness Testing

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Dillon Salsman-Pressley • Programmer Analyst

Hi Dillon,

No problem. R04 passed.

Please execute R09.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hello Susan,

I would appreciate it if you could reset the record.

I've been here for a just over 8 hours straight myself so I don't mind stopping for the day.

Thank you,

Sorry, typo. Should be R03 instead of R09 which I corrected below.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Susan,

Here are the screenshots for R09. There should be 10 total, numbered in order of occurrence. The CSOT was returned with a CSOT Undo In Progress error. I'm guessing this is expected?

Thank you,

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Subject: RE: AK - NMVTIS Readiness Testing R06

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

D.19.36 Vehicle Use Class Code

The utilization of the vehicle.

Source of Definition: MVAs
Source Of Data: Accident report, registrant, MVA
Synonyms: Special Use, Usage Class

Value	Description	Value	Description
00	None (not in use)	08	Agriculture
01	Personal	09	Wrecker or Tow
02	Driver Training	10	Police
03	Construction/Maintenance	11	Other Business
04	Ambulance	12	Fire fighting
05	Military	13	Bus
06	Taxi	97	Other
07	Transportation of property	99	Unknown

VVHUC

Logical Format (Type/Max Length): AN/2

Format=Alpha-numeric Size=2 CLMP-VEH-USE-CLASS

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Thank you,

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63954 DMV00025555

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63954 DMV00025569

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

No problem. I have reset it.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Dillon Salsman-Pressley • Programmer Analyst

Hi Dillon,

No problem. R04 passed.

Please execute R09.

Thanks,
Susan Creighton / 703.908.5893 office

Sorry for the delay. Thought I hit send.

Here's the screenshot for R04.

Subject: RE: AK - NMVTIS Readiness Testing

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I'm seeing your SD requests get bounced back. I'm looking into it.

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Thank you,

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Thank you,

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Hi Dillon, thanks for the update.

Attached is the Defect Status Report that I promised I would try to have out each Friday. I am also attaching an updated Test Case Plan which denotes the test cases completed, etc. Please let me know if you have any questions.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63950 DMV00025649

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

Document ID: 0.7.1187.63950 DMV00025659

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13					
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X		
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222					
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X		
					X Denotes Exclude

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63950 DMV00025663

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,
Susan Creighton / 703.908.5893 office

Sent: Thursday, May 11, 2017 12:17 PM
To: Creighton, Susan
Cc: Garber, Casey; Mina Peters, AK Dept. of Administration
Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

Hi Dillon,

I forgot to ask you to please send me screenshots of the UNI Messages you send opened up in Text format and a high level screenshot of all the responses you receive. It should look like this and don't shrink them as I need to be able to read them. I highlighted how where you need to change the format to text.

Ok, let me check the data. I have to copy our business team on all emails so I'm adding Casey.

Thanks,
Susan Creighton / 703.908.5893 office

Hi AK,

Attached are the minutes for today's meeting. Please let me know if I missed or misstated anything.

Please don't hesitate to let me know if you have questions.

Thanks,

Susan Creighton | Lead Systems Analyst - Quality Assurance Vehicles |AAMVA | 4401 Wilson Blvd, Ste 700, Arlington, VA 22203 | 703.908.5893 | screighton@aamva.org | www.aamva.org

Attachments: R13 - Titling - Brand Add (1 of 1).PNG

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is "AITESTRECORDFORUB", and a screenshot is attached.

Thank you,

Hello Susan,

Document ID: 0.7.1187.63951 DMV00025712

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Hi Dillon,

R07 passed.

R11 has just 1 issue on the C3:

26/3 VTIPJU PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE

Thanks,
Susan Creighton / 703.908.5893 office

From: Dillon Salsman [mailto:dsalsman@resdat.com]

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I'm seeing your SD requests get bounced back. I'm looking into it.

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Thank you,

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Thank you,

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

D.19.36 Vehicle Use Class Code

The utilization of the vehicle.

Source of Definition: MVAs
Source Of Data: Accident report, registrant, MVA
Synonyms: Special Use, Usage Class

Value	Description	Value	Description
00	None (not in use)	08	Agriculture
01	Personal	09	Wrecker or Tow
02	Driver Training	10	Police
03	Construction/Maintenance	11	Other Business
04	Ambulance	12	Fire fighting
05	Military	13	Bus
06	Taxi	97	Other
07	Transportation of property	99	Unknown

VVHUCC — Logical Format (Type/Max Length): AN/2

Format: Alpha-numeric Size: 2 CLMP-VEH-USE-CLASS

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Thank you,

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63951 DMV00025744

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13					
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X		
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222					
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X		
					X Denotes Exclude

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63951 DMV00025758

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

Document ID: 0.7.1187.63951 DMV00025767

I’ve made the change so that performing a manual IU now automatically sends an IT. Please find attached new images from the UNI Web Tool.

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

Document ID: 0.7.1187.63951 DMV00025769

After examining the production code I discovered that an IT is indeed supposed to be automatically sent when an IU is manually sent. I'll make that change as soon as possible.

Good morning,

Thank you for including me, Dillon. Yes, please cc both David and me for UNI specific questions. If there is a business question, please also include Deborah Leonardo.

Regards,

Mina Peters
Analyst Programmer V
State of Alaska
Division of Motor Vehicles
Mina.Peters@alaska.gov

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Okay. Everything looks good except I did not see an IT sent. Is that something you send automatically when you do inquiry or do you have to manually send it?

Thanks,
Susan Creighton / 703.908.5893 office

Understood.

Here's the first page of the log which contains rest of the RI/RJ messages.

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,
Susan Creighton / 703.908.5893 office

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

Hi Dillon,

I forgot to ask you to please send me screenshots of the UNI Messages you send opened up in Text format and a high level screenshot of all the responses you receive. It should look like this and don't shrink them as I need to be able to read them. I highlighted how where you need to change the format to text.

Attachments: R13 - Titling - Brand Add (1 of 1).PNG

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is "AITESTRECORDFORUB", and a screenshot is attached.

Thank you,

Hello Susan,

Document ID: 0.7.1187.63949 DMV00025808

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

R08 passed.

Please execute R09. This time, in addition to the screenshots you have been sending, please also send screenshots of what is displayed to the titling/helpdesk agent for the inquiry as well as each screen they enter data to or receive data back.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

Hello Susan,

Here is R08 from the help desk. Same help desk only situation, as far as I know.

I'll e-mail David & Debra and get a confirmation for all the processes I believe are only accessible through the help desk.

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Here is the R05 completed using the help desk. I don't believe there's a way to perform an In-State Change Undo through the titling system.

No worries, I've reverted the change.

I managed to make in a little earlier this morning. I wouldn't mind starting on the rest of the solicited cases if you're available.

Thank you,

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

D.19.36 Vehicle Use Class Code

The utilization of the vehicle.

Source of Definition: MVAs
Source Of Data: Accident report, registrant, MVA
Synonyms: Special Use, Usage Class

Value	Description	Value	Description
00	None (not in use)	08	Agriculture
01	Personal	09	Wrecker or Tow
02	Driver Training	10	Police
03	Construction/Maintenance	11	Other Business
04	Ambulance	12	Fire fighting
05	Military	13	Bus
06	Taxi	97	Other
07	Transportation of property	99	Unknown

VVHUC

Logical Format (Type/Max Length): AN/2

Format: Alpha-numeric Size: 2 CLMS-VEH-USE-CLASS

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63949 DMV00025840

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

Document ID: 0.7.1187.63949 DMV00025850

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13					
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X		
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222					
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X		
					X Denotes Exclude

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63949 DMV00025854

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Ok, so for R02A did you execute from the Helpdesk or Titling?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

Thanks,

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

Subject: RE: AK - NMVTIS Readiness Testing

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is "AITESTRECORDFORUB", and a screenshot is attached.

Thank you,

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Hi Dillon,

No problem. R04 passed.

Please execute R09.

Thanks,
Susan Creighton / 703.908.5893 office

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hello Susan,

I would appreciate it if you could reset the record.

I've been here for a just over 8 hours straight myself so I don't mind stopping for the day.

Thank you,

Sorry, typo. Should be R03 instead of R09 which I corrected below.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Subject: RE: AK - NMVTIS Readiness Testing R06

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Thank you,

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Thank you,

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63947 DMV00025936

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63947 DMV00025950

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Subject: Reminder for the June 6th FMCSA CDL Division Roundtable

Hello,
In an effort to handle the increased number of attendees, the Bi-Monthly FMCSA CDL Roundtable has changed to using the GoToWebinar program. If you have not already done so, please cancel any previous FMCSA CDL Roundtable calendar appointments and register for the June 6th from 1:00pm to 2:30pm ET roundtable by clicking on the following link: https://attendee.gotowebinar.com/rt/5961853694252701442

The purpose of the call is to discuss topics on relevant issues that affect our State Partners, and FMCSA Divisions and Service Centers as it relates to the Federal Motor Carrier Safety Regulations and Commercial Driver Licensing. If you have any topics that you would like to see discussed, the FMCSA CDL Division is requesting that you submit agenda items, questions, topics, and ideas that you would like discussed as soon as possible to allow the CDL Division sufficient time to prepare a response. Items should be sent to: CDLcompliance@dot.gov

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is "AITESTRECORDFORUB", and a screenshot is attached.

Thank you,

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

Hi Susan,

Here are the screenshots for R09. There should be 10 total, numbered in order of occurrence. The CSOT was returned with a CSOT Undo In Progress error. I'm guessing this is expected?

R08 passed.

Please execute R09. This time, in addition to the screenshots you have been sending, please also send screenshots of what is displayed to the titling/helpdesk agent for the inquiry as well as each screen they enter data to or receive data back.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

Here is R08 from the help desk. Same help desk only situation, as far as I know.

I'll e-mail David & Debra and get a confirmation for all the processes I believe are only accessible through the help desk.

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Here is the R05 completed using the help desk. I don't believe there's a way to perform an In-State Change Undo through the titling system.

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

D.19.36 Vehicle Use Class Code

The utilization of the vehicle.

Source of Definition: MVAs
Source Of Data: Accident report, registrant, MVA
Synonyms: Special Use, Usage Class

Value	Description	Value	Description
00	None (not in use)	08	Agriculture
01	Personal	09	Wrecker or Tow
02	Driver Training	10	Police
03	Construction/Maintenance	11	Other Business
04	Ambulance	12	Fire fighting
05	Military	13	Bus
06	Taxi	97	Other
07	Transportation of property	99	Unknown

VVHUC

Logical Format (Type/Max Length): AN/2

Format - Alpha-numeric Size - 2 CLMP-VEH-USE-CLASS

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Document ID: 0.7.1187.63944 DMV00026033

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63944 DMV00026034

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

Document ID: 0.7.1187.63944 DMV00026044

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13					
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X		
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222					
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X		
					X Denotes Exclude

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63944 DMV00026048

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Cc: Garber, Casey <CGarber@aamva.org>; Peters, Mina L (DOA) <mina.peters@alaska.gov>
Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

Thanks,

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

Subject: RE: AK - NMVTIS Readiness Testing

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is "AITESTRECORDFORUB", and a screenshot is attached.

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hello Susan,

I would appreciate it if you could reset the record.

I've been here for a just over 8 hours straight myself so I don't mind stopping for the day.

Thank you,

Sorry, typo. Should be R03 instead of R09 which I corrected below.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Subject: RE: AK - NMVTIS Readiness Testing R06

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2 GERAEN ERROR ELEMENT AAMVA CODE
99/2 GERAET AAMVA ERROR TYPE
99/2 GERDOC ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10
99/2 GERMTX ERROR MESSAGE TEXT

Still missing:

06/4 VVHUCC VEHICLE USE CLASS CODE (you indicated you are still working on this)
06/4 VVHNAX VEHICLE NUMBER OF AXLES

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63943 DMV00026130

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Document ID: 0.7.1187.63943 DMV00026144

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,
Susan Creighton / 703.908.5893 office

Did you mean Titling or is it really Helpdesk? We already did Helpdesk, correct?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is "AITESTRECORDFORUB", and a screenshot is attached.

Thank you,

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Subject: RE: AK - NMVTIS Readiness Testing R06

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Thank you,

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2 GERAEN ERROR ELEMENT AAMVA CODE
99/2 GERAET AAMVA ERROR TYPE
99/2 GERDOC ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10
99/2 GERMTX ERROR MESSAGE TEXT

Still missing:

06/4 VVHUCC VEHICLE USE CLASS CODE (you indicated you are still working on this)
06/4 VVHNAX VEHICLE NUMBER OF AXLES

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63926 DMV00026226

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13					
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X		
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222					
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X		
					X Denotes Exclude

As for which code is the same, perhaps this diagram will help.

Document ID: 0.7.1187.63926 DMV00026237

Non-white backgrounds indicate color-coordinated shared code, with the exception of the solid blue starting nodes.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63926 DMV00026240

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Subject: RE: AK - NMVTIS Readiness Testing
Attachments: R09 - Help Desk - Change State of Title (1 of 1).PNG

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing

This email comes from an external source, so remember, Think Before You Click!

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is "AITESTRECORDFORUB", and a screenshot is attached.

Thank you,

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Hi Dillon,

No problem. R04 passed.

Please execute R09.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,

Hello Susan,

I'm seeing your SD requests get bounced back. I'm looking into it.

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

Thank you,

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Thank you,

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Thank you,

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Hi Dillon, thanks for the update.

Attached is the Defect Status Report that I promised I would try to have out each Friday. I am also attaching an updated Test Case Plan which denotes the test cases completed, etc. Please let me know if you have any questions.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63925 DMV00026322

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Subject: RE: AK - NMVTIS Readiness Testing R02A

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13					
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X		
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222					
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X		
					X Denotes Exclude

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63925 DMV00026336

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,
Susan Creighton / 703.908.5893 office

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

Hi Dillon,

I forgot to ask you to please send me screenshots of the UNI Messages you send opened up in Text format and a high level screenshot of all the responses you receive. It should look like this and don't shrink them as I need to be able to read them. I highlighted how where you need to change the format to text.

Subject: RE: AK - NMVTIS Readiness Testing
Attachments: R09 - Help Desk - Change State of Title (1 of 1).PNG

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing

This email comes from an external source, so remember, Think Before You Click!

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is "AITESTRECORDFORUB", and a screenshot is attached.

Thank you,

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

This email comes from an external source, so remember, Think Before You Click!
Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

Hi Dillon,

R07 passed.

R11 has just 1 issue on the C3:

26/3 VTIPJU PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE

Thanks,
Susan Creighton / 703.908.5893 office

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Thank you,

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Thank you,

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Thank you,

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.89518 DMV00026419

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

Document ID: 0.7.1187.89518 DMV00026429

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13					
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X		
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222					
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X		
					X Denotes Exclude

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.89518 DMV00026433

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

I've reach out to David for clarification, in the meantime would it be possible to continue the readiness test for the main application?

This email comes from an external source, so remember, Think Before You Click!
Okay, perfect. Please perform the same test using your helpdesk. We have to test that separately since it is standalone.

BTW: I Changed the subject of this email.

Thanks,
Susan Creighton / 703.908.5893 office

I’ve made the change so that performing a manual IU now automatically sends an IT. Please find attached new images from the UNI Web Tool.

After examining the production code I discovered that an IT is indeed supposed to be automatically sent when an IU is manually sent. I'll make that change as soon as possible.

Good morning,

Thank you for including me, Dillon. Yes, please cc both David and me for UNI specific questions. If there is a business question, please also include Deborah Leonardo.

Regards,

Mina Peters

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Okay. Everything looks good except I did not see an IT sent. Is that something you send automatically when you do inquiry or do you have to manually send it?

Thanks,
Susan Creighton / 703.908.5893 office

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,
Susan Creighton / 703.908.5893 office

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

Hi Dillon,

I forgot to ask you to please send me screenshots of the UNI Messages you send opened up in Text format and a high level screenshot of all the responses you receive. It should look like this and don't shrink them as I need to be able to read them. I highlighted how where you need to change the format to text.

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is "AITESTRECORDFORUB", and a screenshot is attached.

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

Hi Susan,

Here are the screenshots for R09. There should be 10 total, numbered in order of occurrence. The CSOT was returned with a CSOT Undo In Progress error. I'm guessing this is expected?

Thank you,

R08 passed.

Please execute R09. This time, in addition to the screenshots you have been sending, please also send screenshots of what is displayed to the titling/helpdesk agent for the inquiry as well as each screen they enter data to or receive data back.

Thanks,
Susan Creighton / 703.908.5893 office

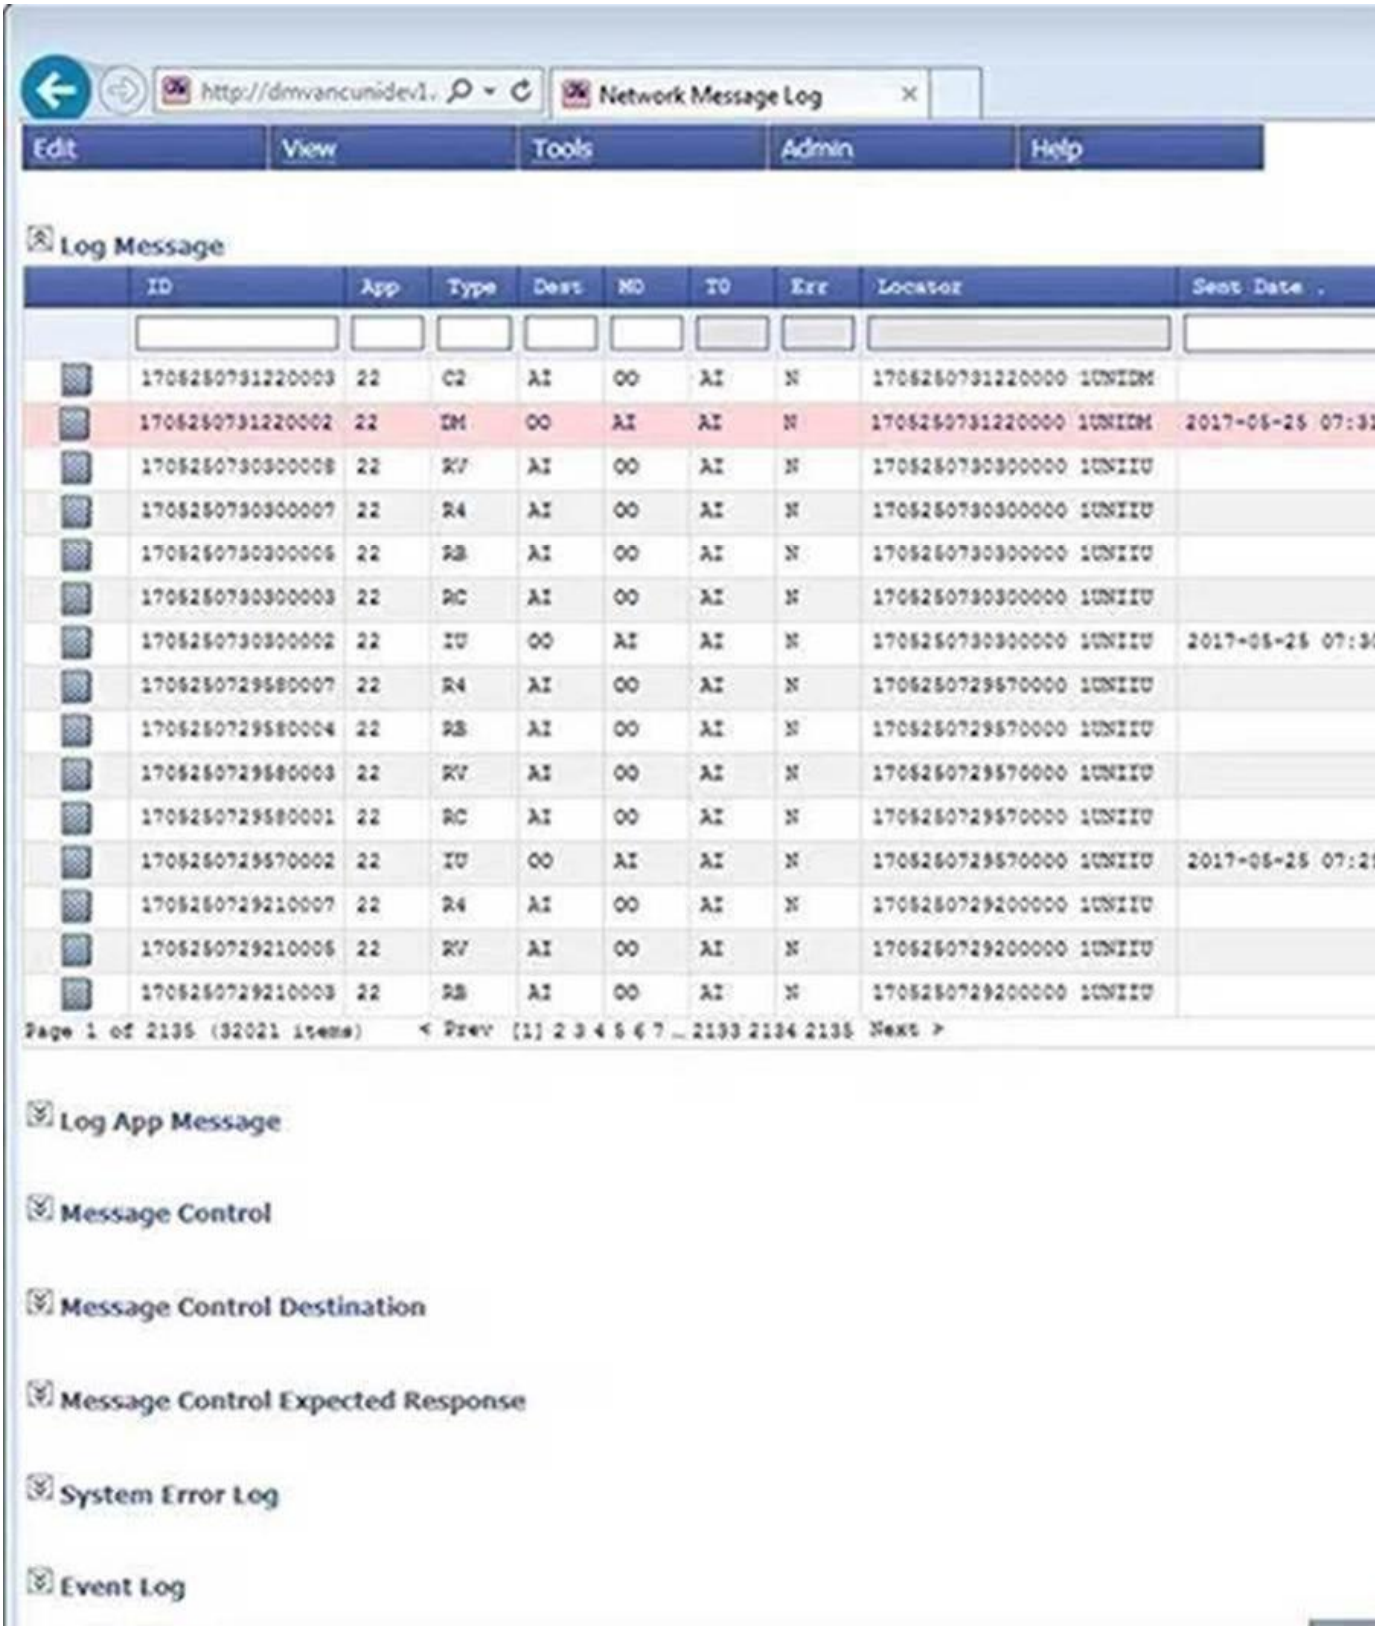
Hello Susan,

Here is R08 from the help desk. Same help desk only situation, as far as I know.

I'll e-mail David & Debra and get a confirmation for all the processes I believe are only accessible through the help desk.



Thank you,

Dillon Salsman-Pressley • Programmer Analyst

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Here is the R05 completed using the help desk. I don't believe there's a way to perform an In-State Change Undo through the titling system.

No worries, I've reverted the change.

I managed to make in a little earlier this morning. I wouldn't mind starting on the rest of the solicited cases if you're available.

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2 GERAEN ERROR ELEMENT AAMVA CODE
99/2 GERAET AAMVA ERROR TYPE
99/2 GERDOC ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10
99/2 GERMTX ERROR MESSAGE TEXT

Still missing:

06/4 VVHUCC VEHICLE USE CLASS CODE (you indicated you are still working on this)
06/4 VVHNAX VEHICLE NUMBER OF AXLES

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.89510 DMV00026516

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

Document ID: 0.7.1187.89510 DMV00026526

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13					
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X		
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222					
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X		
					X Denotes Exclude

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

Document ID: 0.7.1187.89510 DMV00026529

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.89510 DMV00026530

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Ok, so for R02A did you execute from the Helpdesk or Titling?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

Thanks,

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

Subject: RE: AK - NMVTIS Readiness Testing

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,
Susan Creighton / 703.908.5893 office

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is "AITESTRECORDFORUB", and a screenshot is attached.

Thank you,

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

This email comes from an external source, so remember, Think Before You Click!

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

Hi Susan,

Here are the screenshots for R09. There should be 10 total, numbered in order of occurrence. The CSOT was returned with a CSOT Undo In Progress error. I'm guessing this is expected?

Thank you,

R08 passed.

Please execute R09. This time, in addition to the screenshots you have been sending, please also send screenshots of what is displayed to the titling/helpdesk agent for the inquiry as well as each screen they enter data to or receive data back.

Thanks,
Susan Creighton / 703.908.5893 office

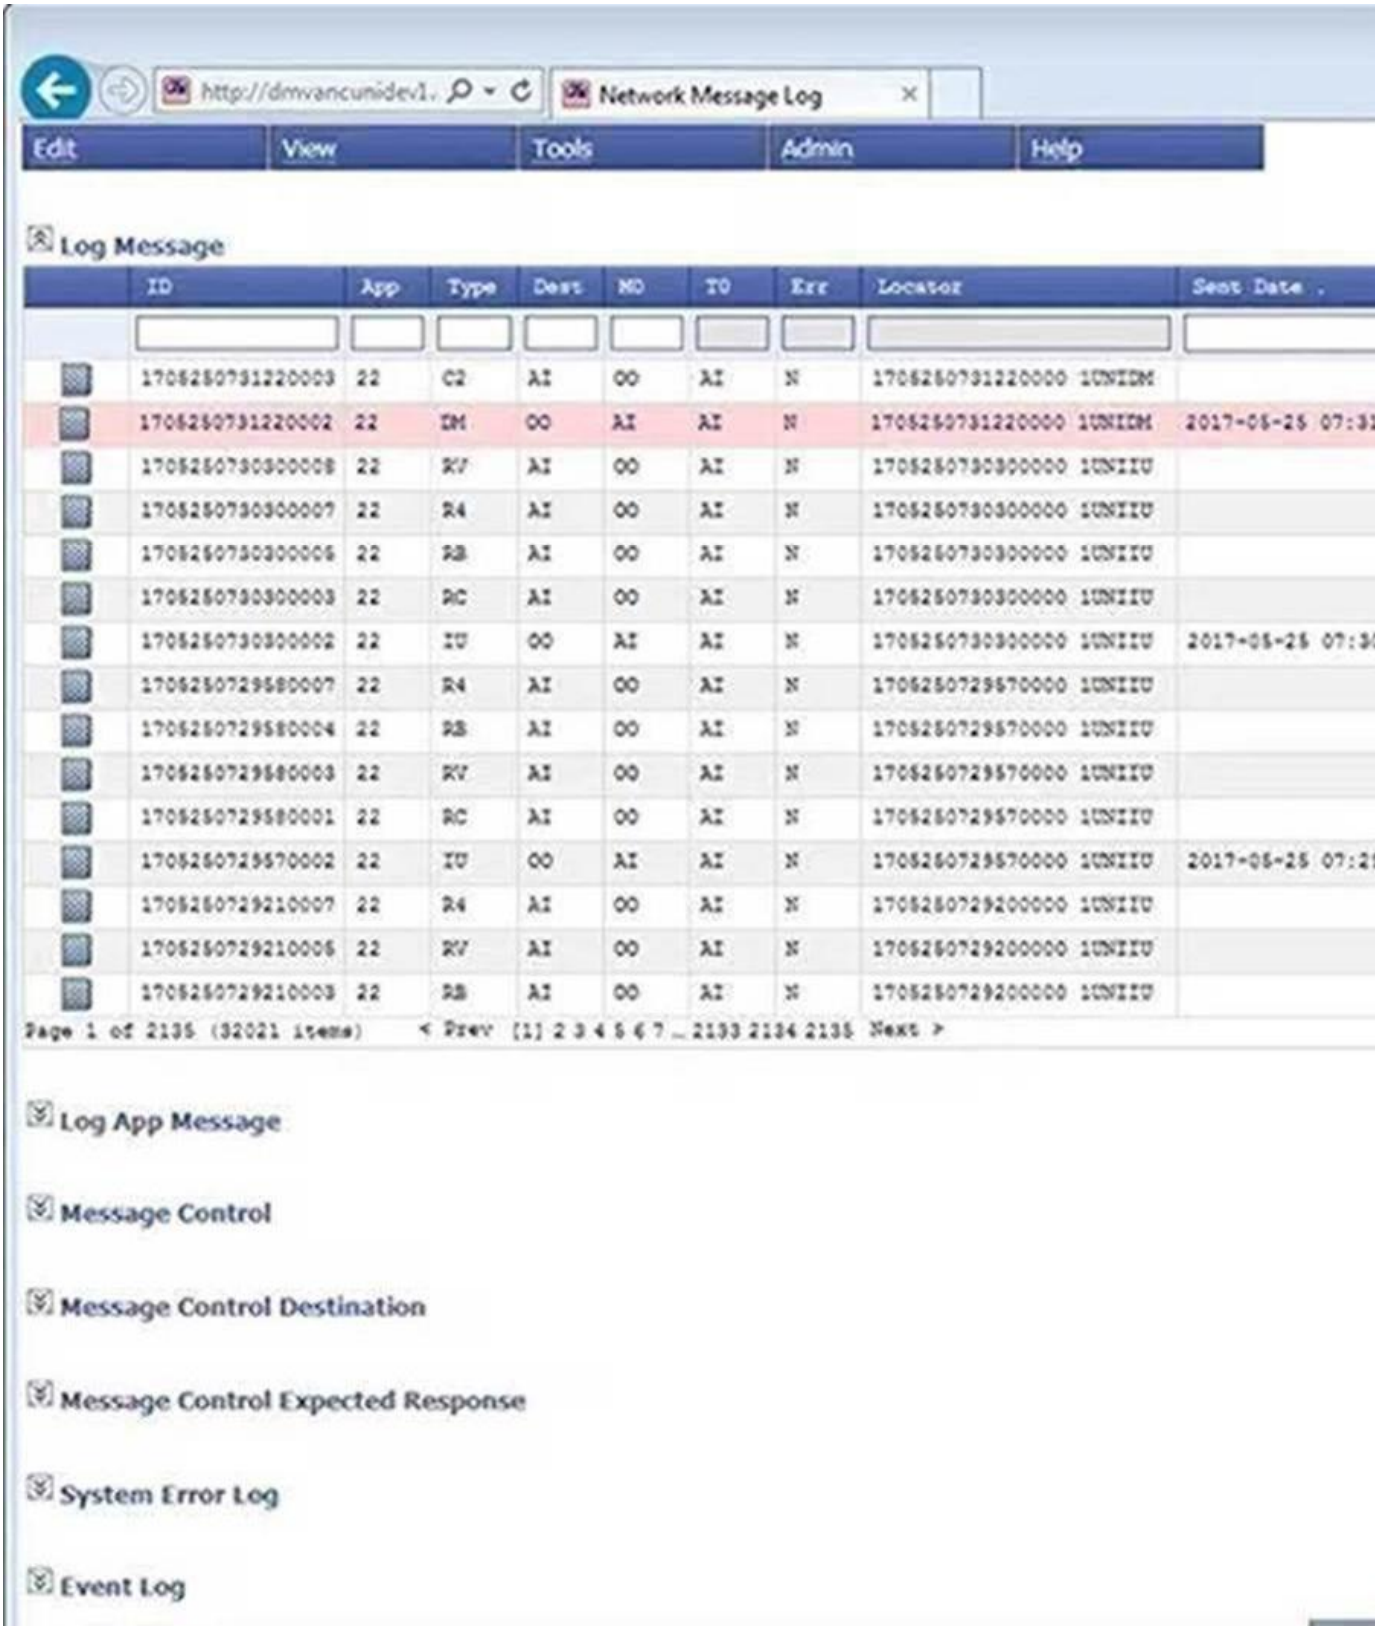
Hello Susan,

Here is R08 from the help desk. Same help desk only situation, as far as I know.

I'll e-mail David & Debra and get a confirmation for all the processes I believe are only accessible through the help desk.



Thank you,

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Here is the R05 completed using the help desk. I don't believe there's a way to perform an In-State Change Undo through the titling system.

No worries, I've reverted the change.

I managed to make in a little earlier this morning. I wouldn't mind starting on the rest of the solicited cases if you're available.

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63924 DMV00026612

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

Document ID: 0.7.1187.63924 DMV00026622

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13					
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X		
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222					
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X		
					X Denotes Exclude

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63924 DMV00026626

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Cc: Garber, Casey <CGarber@aamva.org>; Peters, Mina L (DOA) <mina.peters@alaska.gov>
Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Cc: Garber, Casey; Mina Peters, AK Dept. of Administration; David Nolen, AK Dept. of Administration
Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

Thanks,

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

Hello Debra,

Should any titling events happen when adding a J status message (and "JUNKED" brand) to a vehicle? If so could you explain the sequence of events, please?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is "AITESTRECORDFORUB", and a screenshot is attached.

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Susan,

Here are the screenshots for R09. There should be 10 total, numbered in order of occurrence. The CSOT was returned with a CSOT Undo In Progress error. I'm guessing this is expected?

Thank you,

R08 passed.

Please execute R09. This time, in addition to the screenshots you have been sending, please also send screenshots of what is displayed to the titling/helpdesk agent for the inquiry as well as each screen they enter data to or receive data back.

Thanks,
Susan Creighton / 703.908.5893 office

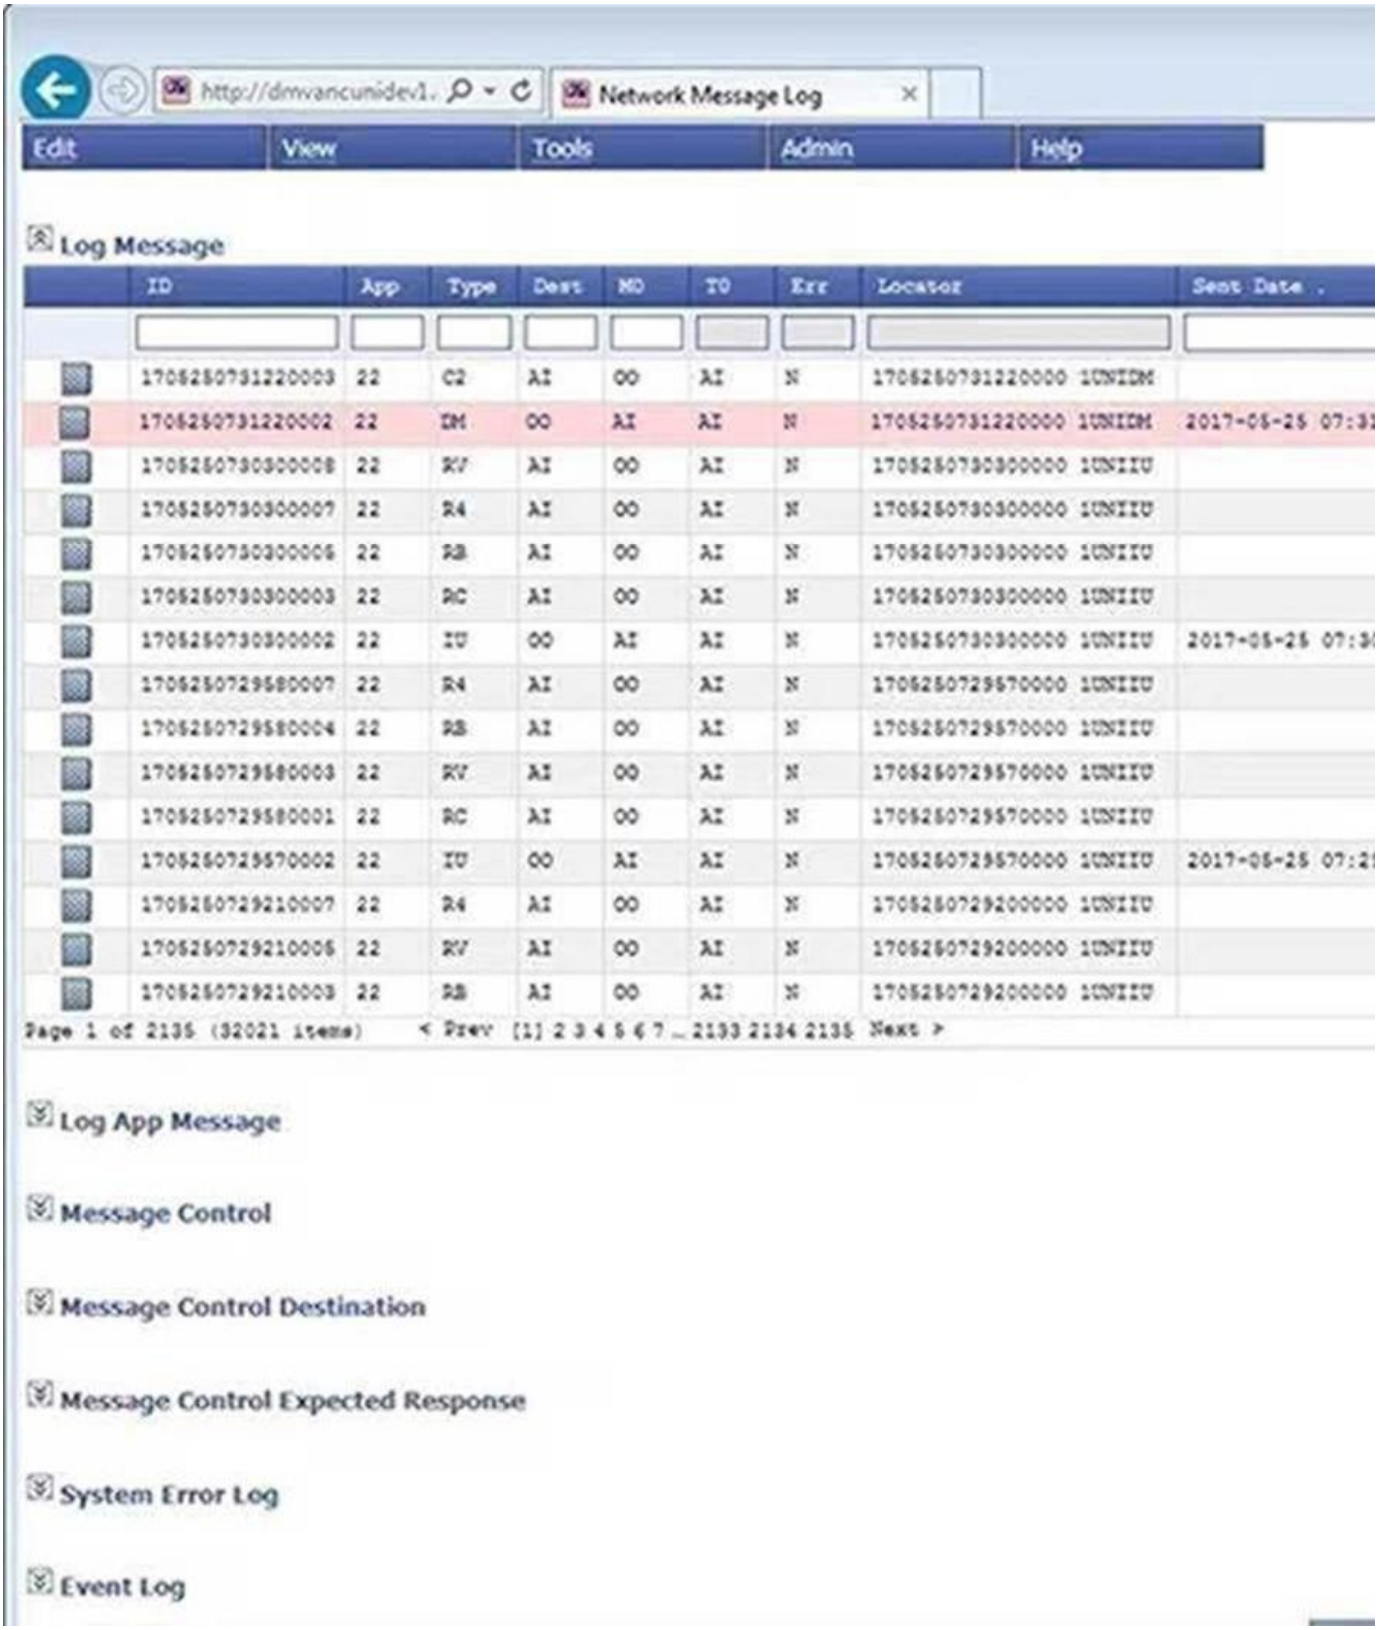
Hello Susan,

Here is R08 from the help desk. Same help desk only situation, as far as I know.

I'll e-mail David & Debra and get a confirmation for all the processes I believe are only accessible through the help desk.



Thank you,

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Here is the R05 completed using the help desk. I don't believe there's a way to perform an In-State Change Undo through the titling system.

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2 GERAEN ERROR ELEMENT AAMVA CODE
99/2 GERAET AAMVA ERROR TYPE
99/2 GERDOC ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10
99/2 GERMTX ERROR MESSAGE TEXT

Still missing:

06/4 VVHUCC VEHICLE USE CLASS CODE (you indicated you are still working on this)
06/4 VVHNAX VEHICLE NUMBER OF AXLES

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63920 DMV00026708

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13					
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X		
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222					
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X		
					X Denotes Exclude

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63920 DMV00026722

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,
Susan Creighton / 703.908.5893 office

Here is my understanding of what we eliminated today:

R03 through titling
R04 through titling
R09 through help desk
and we're redoing R13 - titling

I've attached both titling and help desk versions of all three tests cases.

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is "AITESTRECORDFORUB", and a screenshot is attached.

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

Hi Susan,

Here are the screenshots for R09. There should be 10 total, numbered in order of occurrence. The CSOT was returned with a CSOT Undo In Progress error. I'm guessing this is expected?

Thank you,

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Subject: RE: AK - NMVTIS Readiness Testing R06

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4	VVHUCC	VEHICLE USE CLASS CODE	There appears to be no way to support this parameter
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Thank you,

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63916 DMV00026805

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63916 DMV00026819

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Subject: RE: AK - NMVTIS Readiness Testing

Hi Dillon,

Adding a J status message to a vehicle record does not cause any titling events in itself. Adding this status to the vehicle record does generate a cover page with a bar code so the documents containing the information about the accident that led to the vehicle being "totaled out" by the insurance company can be microfilmed and placed with the vehicles official DMV record.

Hello Debra,

Should any titling events happen when adding a J status message (and "JUNKED" brand) to a vehicle? If so could you explain the sequence of events, please?

Thank you,

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

This email comes from an external source, so remember, Think Before You Click!
I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is "AITESTRECORDFORUB", and a screenshot is attached.

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Subject: RE: AK - NMVTIS Readiness Testing R06

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Thank you,

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2 GERAEN ERROR ELEMENT AAMVA CODE
99/2 GERAET AAMVA ERROR TYPE
99/2 GERDOC ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10
99/2 GERMTX ERROR MESSAGE TEXT

Still missing:

06/4 VVHUCC VEHICLE USE CLASS CODE (you indicated you are still working on this)
06/4 VVHNAX VEHICLE NUMBER OF AXLES

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63915 DMV00026918

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63915 DMV00026932

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

This email comes from an external source, so remember, Think Before You Click!

Hi AK,

Attached are the minutes for today's meeting. Please let me know if I missed or misstated anything.

Please don't hesitate to let me know if you have questions.

Thanks,

Susan Creighton | Lead Systems Analyst - Quality Assurance Vehicles |AAMVA | 4401 Wilson Blvd, Ste 700, Arlington, VA 22203 | 703.908.5893 | screighton@aamva.org | www.aamva.org

Be part of the solution.

Help protect states and consumers from vehicle fraud and unsafe vehicles; get information from the National Motor Vehicle Title Information System.

Subject: RE: AK - NMVTIS Readiness Testing

Ok, I just want to make sure I have this correct so that I can ensure my expected results are correct for the online scenario testing. When you send a Salvage Brand to us you will not be sending a new title record unless there is a separate titling event that happens at the same time. Is that correct?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

Hi Dillon,

Adding a J status message to a vehicle record does not cause any titling events in itself. Adding this status to the vehicle record does generate a cover page with a bar code so the documents containing the information about the accident that led to the vehicle being "totaled out" by the insurance company can be microfilmed and placed with the vehicles official DMV record.

Hello Debra,

Should any titling events happen when adding a J status message (and “JUNKED” brand) to a vehicle? If so could you explain the sequence of events, please?

Thank you,

Hello Susan,

I used their function for adding a salvage status (they call it “junked” and it’s different than brand code 8 “junk”) to the vehicle. Let me ask Debra.

In the meantime, I can do the version you’re describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

This email comes from an external source, so remember, Think Before You Click!

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is "AITESTRECORDFORUB", and a screenshot is attached.

Thank you,

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

Hi Dillon,

R07 passed.

R11 has just 1 issue on the C3:

26/3 VTIPJU PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE

Thanks,
Susan Creighton / 703.908.5893 office

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I'm seeing your SD requests get bounced back. I'm looking into it.

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Thank you,

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Thank you,

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2 GERAEN ERROR ELEMENT AAMVA CODE
99/2 GERAET AAMVA ERROR TYPE
99/2 GERDOC ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10
99/2 GERMTX ERROR MESSAGE TEXT

Still missing:

06/4 VVHUCC VEHICLE USE CLASS CODE (you indicated you are still working on this)
06/4 VVHNAX VEHICLE NUMBER OF AXLES

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63913 DMV00027016

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

Document ID: 0.7.1187.63913 DMV00027026

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13					
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X		
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222					
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X		
					X Denotes Exclude

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63913 DMV00027030

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

Document ID: 0.7.1187.63913 DMV00027039

I’ve made the change so that performing a manual IU now automatically sends an IT. Please find attached new images from the UNI Web Tool.

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

After examining the production code I discovered that an IT is indeed supposed to be automatically sent when an IU is manually sent. I'll make that change as soon as possible.

Good morning,

Thank you for including me, Dillon. Yes, please cc both David and me for UNI specific questions. If there is a business question, please also include Deborah Leonardo.

Regards,

Mina Peters

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Okay. Everything looks good except I did not see an IT sent. Is that something you send automatically when you do inquiry or do you have to manually send it?

Thanks,
Susan Creighton / 703.908.5893 office

Understood.

Here's the first page of the log which contains rest of the RI/RJ messages.

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,
Susan Creighton / 703.908.5893 office

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

Hi Dillon,

I forgot to ask you to please send me screenshots of the UNI Messages you send opened up in Text format and a high level screenshot of all the responses you receive. It should look like this and don't shrink them as I need to be able to read them. I highlighted how where you need to change the format to text.

Subject: RE: AK - NMVTIS Readiness Testing

Ok, I just want to make sure I have this correct so that I can ensure my expected results are correct for the online scenario testing. When you send a Salvage Brand to us you will not be sending a new title record unless there is a separate titling event that happens at the same time. Is that correct?

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

Adding a J status message to a vehicle record does not cause any titling events in itself. Adding this status to the vehicle record does generate a cover page with a bar code so the documents containing the information about the accident that led to the vehicle being "totaled out" by the insurance company can be microfilmed and placed with the vehicles official DMV record.

Hello Debra,

Should any titling events happen when adding a J status message (and "JUNKED" brand) to a vehicle? If so could you explain the sequence of events, please?

Thank you,

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Here is the R05 completed using the help desk. I don't believe there's a way to perform an In-State Change Undo through the titling system.

Hi Dillon,

Yes, I can work on it this morning. I'll re-drive the NT now.

Thanks,
Susan Creighton / 703.908.5893 office

No worries, I've reverted the change.

I managed to make in a little earlier this morning. I wouldn't mind starting on the rest of the solicited cases if you're available.

Thank you,

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

Thank you,

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Subject: RE: AK - NMVTIS Readiness Testing R06

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

Good morning Susan,

I'm ready to pick up where we left off Friday when you are. I've resolved the issue with the record you tested SC against.

Thank you,

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13					
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X		
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222					
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X		
					X Denotes Exclude

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.89513 DMV00027129

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

Ok, I think we won't have to test it separately, but I'm checking to be sure. In the meantime, let's go ahead with R02B.

Thanks,
Susan Creighton / 703.908.5893 office

From: Dillon Salsman [mailto:dsalsman@resdat.com]

Subject: RE: AK - NMVTIS Readiness Testing

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

Cc: Garber, Casey; Mina Peters, AK Dept. of Administration; David Nolen, AK Dept. of Administration
Subject: RE: AK - NMVTIS Readiness Testing

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

It's the NMVTIS menu on the mainframe. Use PF9 from the vehicle menu.

If the help desk application is indeed separate as previously indicated, I do not have access to it.

I've reach out to David for clarification, in the meantime would it be possible to continue the readiness test for the main application?

Okay, perfect. Please perform the same test using your helpdesk. We have to test that separately since it is standalone.

BTW: I Changed the subject of this email.

Thanks,

I’ve made the change so that performing a manual IU now automatically sends an IT. Please find attached new images from the UNI Web Tool.

After examining the production code I discovered that an IT is indeed supposed to be automatically sent when an IU is manually sent. I'll make that change as soon as possible.

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Okay. Everything looks good except I did not see an IT sent. Is that something you send automatically when you do inquiry or do you have to manually send it?

Thanks,
Susan Creighton / 703.908.5893 office

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,
Susan Creighton / 703.908.5893 office

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

Hi Dillon,

I forgot to ask you to please send me screenshots of the UNI Messages you send opened up in Text format and a high level screenshot of all the responses you receive. It should look like this and don't shrink them as I need to be able to read them. I highlighted how where you need to change the format to text.

Ok, I just want to make sure I have this correct so that I can ensure my expected results are correct for the online scenario testing. When you send a Salvage Brand to us you will not be sending a new title record unless there is a separate titling event that happens at the same time. Is that correct?

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

Adding a J status message to a vehicle record does not cause any titling events in itself. Adding this status to the vehicle record does generate a cover page with a bar code so the documents containing the information about the accident that led to the vehicle being "totaled out" by the insurance company can be microfilmed and placed with the vehicles official DMV record.

Subject: RE: AK - NMVTIS Readiness Testing

Hello Debra,

Should any titling events happen when adding a J status message (and "JUNKED" brand) to a vehicle? If so could you explain the sequence of events, please?

Thank you,

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is “AITESTRECORDFORUB”, and a screenshot is attached.

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,

This email comes from an external source, so remember, Think Before You Click!

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

Hi Susan,

Here are the screenshots for R09. There should be 10 total, numbered in order of occurrence. The CSOT was returned with a CSOT Undo In Progress error. I'm guessing this is expected?

Thank you,

R08 passed.

Please execute R09. This time, in addition to the screenshots you have been sending, please also send screenshots of what is displayed to the titling/helpdesk agent for the inquiry as well as each screen they enter data to or receive data back.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

Here is R08 from the help desk. Same help desk only situation, as far as I know.

I'll e-mail David & Debra and get a confirmation for all the processes I believe are only accessible through the help desk.

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Here is the R05 completed using the help desk. I don't believe there's a way to perform an In-State Change Undo through the titling system.

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2 GERAEN ERROR ELEMENT AAMVA CODE
99/2 GERAET AAMVA ERROR TYPE
99/2 GERDOC ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10
99/2 GERMTX ERROR MESSAGE TEXT

Still missing:

06/4 VVHUCC VEHICLE USE CLASS CODE (you indicated you are still working on this)
06/4 VVHNAX VEHICLE NUMBER OF AXLES

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63912 DMV00027214

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13					
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X		
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222					
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X		
					X Denotes Exclude

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63912 DMV00027228

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Thanks,

To: Creighton, Susan <screighton@aamva.org>; Nolen, David B (DOA) <david.nolen@alaska.gov>
Cc: Garber, Casey <CGarber@aamva.org>; Peters, Mina L (DOA) <mina.peters@alaska.gov>
Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Cc: Garber, Casey; Mina Peters, AK Dept. of Administration; David Nolen, AK Dept. of Administration
Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

Thanks,
Susan Creighton / 703.908.5893 office

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

Subject: RE: AK - NMVTIS Readiness Testing

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,
Susan Creighton / 703.908.5893 office

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

What you did is fine for the Helpdesk readiness testing. R09 passed and R13 passed. Please go ahead and execute R10. Will it be from Titling or Helpdesk? I'm showing we test R10 via Helpdesk last time.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is "AITESTRECORDFORUB", and a screenshot is attached.

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Susan,

Here are the screenshots for R09. There should be 10 total, numbered in order of occurrence. The CSOT was returned with a CSOT Undo In Progress error. I'm guessing this is expected?

Thank you,

R08 passed.

Please execute R09. This time, in addition to the screenshots you have been sending, please also send screenshots of what is displayed to the titling/helpdesk agent for the inquiry as well as each screen they enter data to or receive data back.

Thanks,
Susan Creighton / 703.908.5893 office

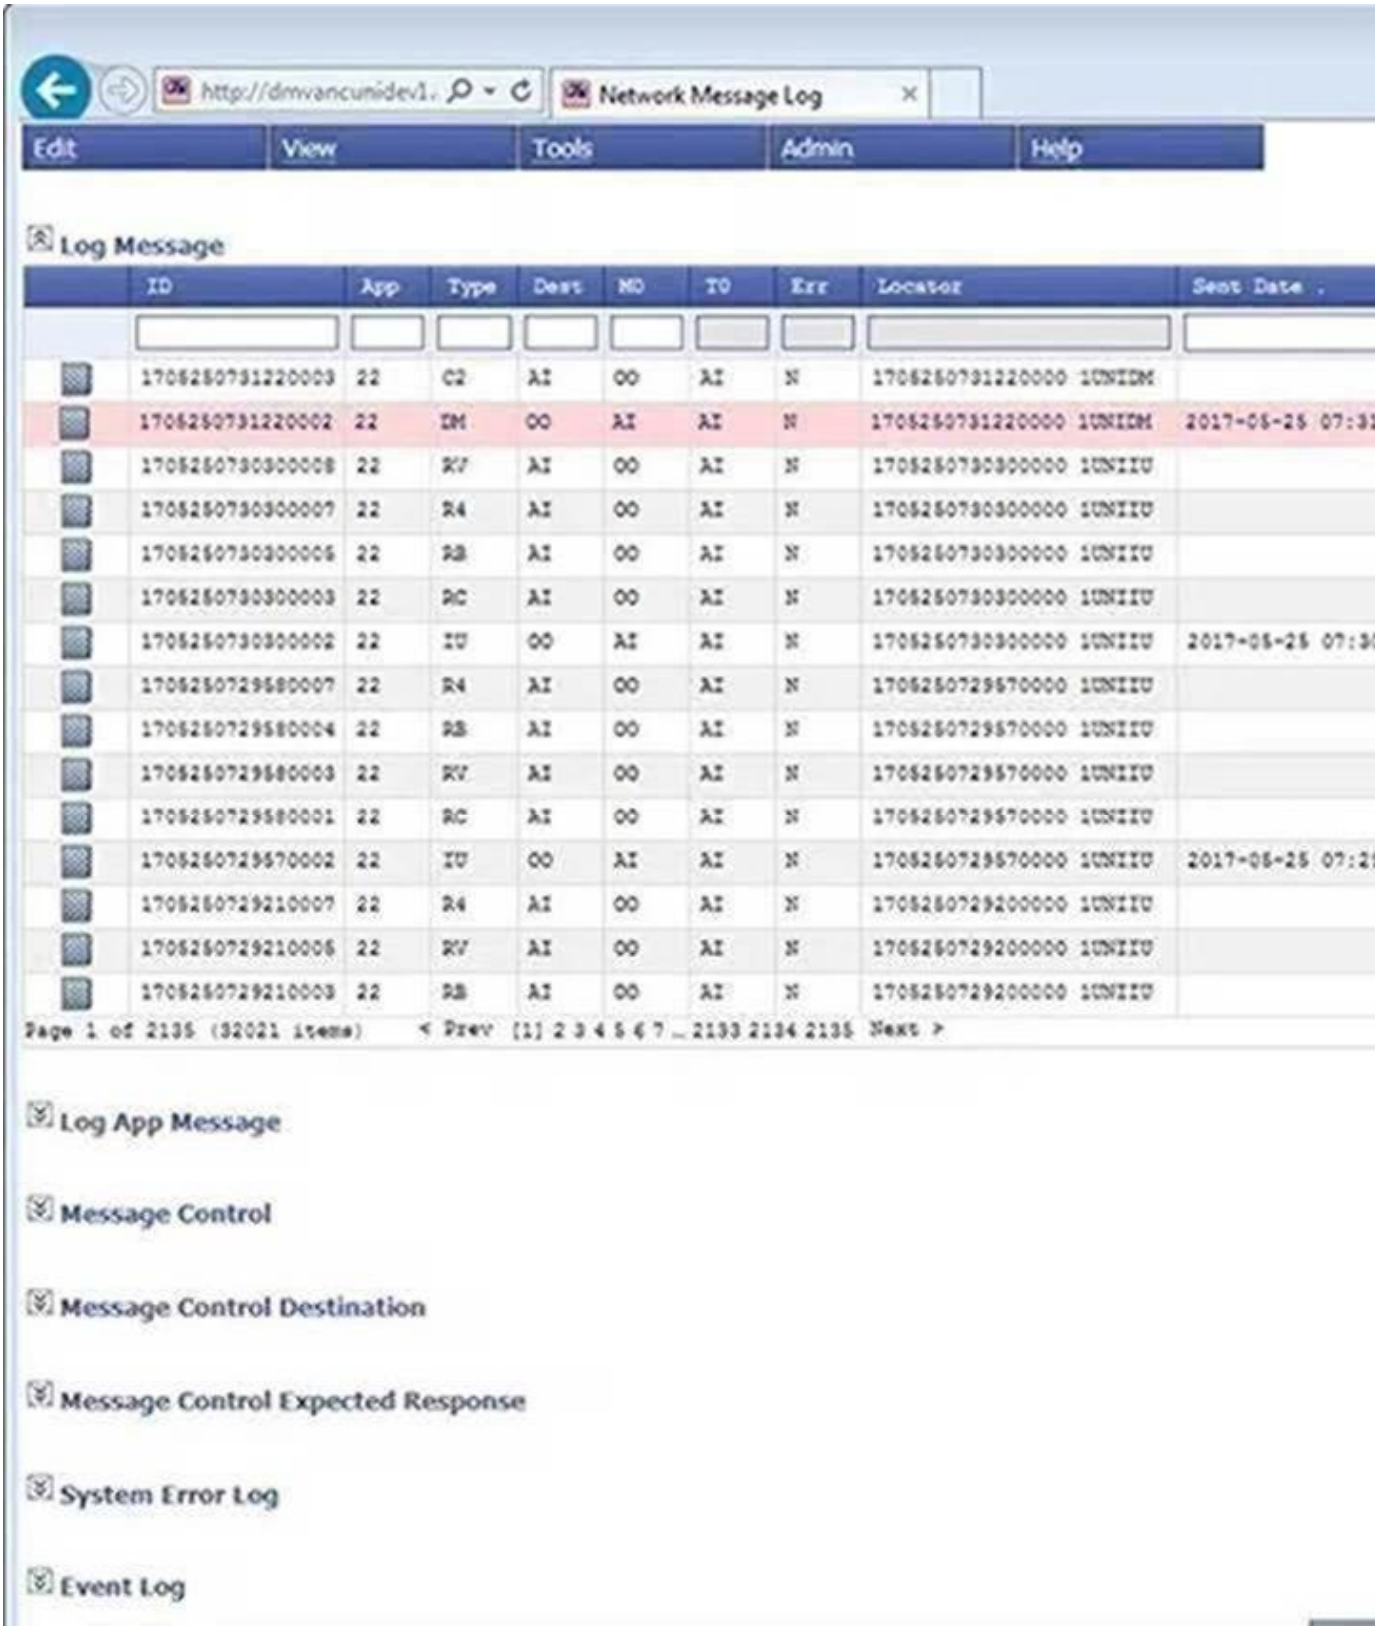
Hello Susan,

Here is R08 from the help desk. Same help desk only situation, as far as I know.

I'll e-mail David & Debra and get a confirmation for all the processes I believe are only accessible through the help desk.



Thank you,

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Here is the R05 completed using the help desk. I don't believe there's a way to perform an In-State Change Undo through the titling system.

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2 GERAEN ERROR ELEMENT AAMVA CODE
99/2 GERAET AAMVA ERROR TYPE
99/2 GERDOC ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10
99/2 GERMTX ERROR MESSAGE TEXT

Still missing:

06/4 VVHUCC VEHICLE USE CLASS CODE (you indicated you are still working on this)
06/4 VVHNAX VEHICLE NUMBER OF AXLES

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63703 DMV00027311

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13					
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X		
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222					
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X		
					X Denotes Exclude

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63703 DMV00027325

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Cc: Garber, Casey <CGarber@aamva.org>; Peters, Mina L (DOA) <mina.peters@alaska.gov>
Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,
Susan Creighton / 703.908.5893 office

This email comes from an external source, so remember, Think Before You Click!

What you did is fine for the Helpdesk readiness testing. R09 passed and R13 passed. Please go ahead and execute R10. Will it be from Titling or Helpdesk? I'm showing we test R10 via Helpdesk last time.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is "AITESTRECORDFORUB", and a screenshot is attached.

Thank you,

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

R08 passed.

Please execute R09. This time, in addition to the screenshots you have been sending, please also send screenshots of what is displayed to the titling/helpdesk agent for the inquiry as well as each screen they enter data to or receive data back.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

Here is R08 from the help desk. Same help desk only situation, as far as I know.

I'll e-mail David & Debra and get a confirmation for all the processes I believe are only accessible through the help desk.

Document ID: 0.7.1187.63702 DMV00027385

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Here is the R05 completed using the help desk. I don't believe there's a way to perform an In-State Change Undo through the titling system.

No worries, I've reverted the change.

I managed to make in a little earlier this morning. I wouldn't mind starting on the rest of the solicited cases if you're available.

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Thank you,

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

Thank you,

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

D.19.36 Vehicle Use Class Code

The utilization of the vehicle.

Source of Definition: MVAs
Source Of Data: Accident report, registrant, MVA
Synonyms: Special Use, Usage Class

Value	Description	Value	Description
00	None (not in use)	08	Agriculture
01	Personal	09	Wrecker or Tow
02	Driver Training	10	Police
03	Construction/Maintenance	11	Other Business
04	Ambulance	12	Fire fighting
05	Military	13	Bus
06	Taxi	97	Other
07	Transportation of property	99	Unknown

VVHUCC — Logical Format (Type/Max Length): AN/2

Format - Alpha-numeric Size - 2 CLMP-VEH-USE-CLASS

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2 GERAEN ERROR ELEMENT AAMVA CODE
99/2 GERAET AAMVA ERROR TYPE
99/2 GERDOC ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10
99/2 GERMTX ERROR MESSAGE TEXT

Still missing:

06/4 VVHUCC VEHICLE USE CLASS CODE (you indicated you are still working on this)
06/4 VVHNAX VEHICLE NUMBER OF AXLES

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63702 DMV00027408

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

Document ID: 0.7.1187.63702 DMV00027418

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13					
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X		
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222					
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X		
					X Denotes Exclude

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63702 DMV00027422

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

Thanks,
Susan Creighton / 703.908.5893 office

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

Subject: RE: AK - NMVTIS Readiness Testing

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,
Susan Creighton / 703.908.5893 office

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

What you did is fine for the Helpdesk readiness testing. R09 passed and R13 passed. Please go ahead and execute R10. Will it be from Titling or Helpdesk? I'm showing we test R10 via Helpdesk last time.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

Dillon Salsman-Pressley • Programmer Analyst

Subject: RE: AK - NMVTIS Readiness Testing

This email comes from an external source, so remember, Think Before You Click!
I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is "AITESTRECORDFORUB", and a screenshot is attached.

Thank you,

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Document ID: 0.7.1187.89514 DMV00027473

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hello Susan,

I would appreciate it if you could reset the record.

I've been here for a just over 8 hours straight myself so I don't mind stopping for the day.

Thank you,

Sorry, typo. Should be R03 instead of R09 which I corrected below.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Subject: RE: AK - NMVTIS Readiness Testing R06

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

D.19.36 Vehicle Use Class Code

The utilization of the vehicle.

Source of Definition: MVAs
Source Of Data: Accident report, registrant, MVA
Synonyms: Special Use, Usage Class

Value	Description	Value	Description
00	None (not in use)	08	Agriculture
01	Personal	09	Wrecker or Tow
02	Driver Training	10	Police
03	Construction/Maintenance	11	Other Business
04	Ambulance	12	Fire fighting
05	Military	13	Bus
06	Taxi	97	Other
07	Transportation of property	99	Unknown

VVHUCC

Logical Format (Type/Max Length): AN/2

Format - Alpha-numeric Size - 2 CLMP-VEH-USE-CLASS

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2 GERAEN ERROR ELEMENT AAMVA CODE
99/2 GERAET AAMVA ERROR TYPE
99/2 GERDOC ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10
99/2 GERMTX ERROR MESSAGE TEXT

Still missing:

06/4 VVHUCC VEHICLE USE CLASS CODE (you indicated you are still working on this)
06/4 VVHNAX VEHICLE NUMBER OF AXLES

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.89514 DMV00027505

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.89514 DMV00027519

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Good morning Susan. I'm in the office and I'll send R02A shortly. Just going to grab a cup of coffee and restart my computer first.

To: Creighton, Susan
Cc: Garber, Casey; Chaudhry, Amir; Peters, Mina L (DOA); Anderson, Patrick (DOA sponsored); Nolen, David B (DOA)
Subject: RE: AK - NMVTIS Readiness Testing

The one exception would've been the Brand Undo when change from salvage to reconstructed brand, but we're removing that as you've indicated the brand history should remain intact.

What you did is fine for the Helpdesk readiness testing. R09 passed and R13 passed. Please go ahead and execute R10. Will it be from Titling or Helpdesk? I'm showing we test R10 via Helpdesk last time.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is "AITESTRECORDFORUB", and a screenshot is attached.

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Anderson <panderson@resdat.com>
Subject: RE: AK - NMVTIS Readiness Testing R06

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Thank you,

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Thank you,

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Hi Dillon, thanks for the update.

Attached is the Defect Status Report that I promised I would try to have out each Friday. I am also attaching an updated Test Case Plan which denotes the test cases completed, etc. Please let me know if you have any questions.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2 GERAEN ERROR ELEMENT AAMVA CODE
99/2 GERAET AAMVA ERROR TYPE
99/2 GERDOC ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10
99/2 GERMTX ERROR MESSAGE TEXT

Still missing:

06/4 VVHUCC VEHICLE USE CLASS CODE (you indicated you are still working on this)
06/4 VVHNAX VEHICLE NUMBER OF AXLES

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63700 DMV00027616

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

This email comes from an external source, so remember, Think Before You Click!

Hi AK,

Attached are the minutes for today's meeting. Please let me know if I missed or misstated anything.

Please don't hesitate to let me know if you have questions.

Thanks,

Susan Creighton | Lead Systems Analyst - Quality Assurance Vehicles |AAMVA | 4401 Wilson Blvd, Ste 700, Arlington, VA 22203 | 703.908.5893 | screighton@aamva.org | www.aamva.org

Be part of the solution.

Help protect states and consumers from vehicle fraud and unsafe vehicles; get information from the National Motor Vehicle Title Information System.

Subject: RE: AK - NMVTIS Readiness Testing

Oh, sorry. I missed excluding in on the test case plan. That means we have completed as much as we can of the readiness testing as they are still working on our access to the NICB theft system so I cannot yet validate the IT message.

In the meanwhile, would you go ahead and do the IT on the VIN that is provided and let me know if you are seeing the theft hit via your screens that are displayed to your clerks/helpdesk? I'm not sure when they will have our access working and I don't want that to hold us up.

Thanks,
Susan Creighton / 703.908.5893 office

What you did is fine for the Helpdesk readiness testing. R09 passed and R13 passed. Please go ahead and execute R10. Will it be from Titling or Helpdesk? I'm showing we test R10 via Helpdesk last time.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

Yes, I can work on it this morning. I'll re-drive the NT now.

Thanks,
Susan Creighton / 703.908.5893 office

No worries, I've reverted the change.

I managed to make in a little earlier this morning. I wouldn't mind starting on the rest of the solicited cases if you're available.

Thank you,

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

Hi Dillon,

R07 passed.

R11 has just 1 issue on the C3:

26/3 VTIPJU PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE

Thanks,
Susan Creighton / 703.908.5893 office

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Subject: RE: AK - NMVTIS Readiness Testing R06

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

Thank you,

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Subject: RE: AK - NMVTIS Readiness Testing R06

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63699 DMV00027699

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

Good morning Susan,

I'm ready to pick up where we left off Friday when you are. I've resolved the issue with the record you tested SC against.

Thank you,

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

Document ID: 0.7.1187.63699 DMV00027709

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13					
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X		
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222					
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X		
					X Denotes Exclude

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63699 DMV00027713

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

Ok, I think we won't have to test it separately, but I'm checking to be sure. In the meantime, let's go ahead with R02B.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

Subject: RE: AK - NMVTIS Readiness Testing

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

It's the NMVTIS menu on the mainframe. Use PF9 from the vehicle menu.

If the help desk application is indeed separate as previously indicated, I do not have access to it.

I've reach out to David for clarification, in the meantime would it be possible to continue the readiness test for the main application?

Okay, perfect. Please perform the same test using your helpdesk. We have to test that separately since it is standalone.

BTW: I Changed the subject of this email.

Thanks,

I’ve made the change so that performing a manual IU now automatically sends an IT. Please find attached new images from the UNI Web Tool.

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

After examining the production code I discovered that an IT is indeed supposed to be automatically sent when an IU is manually sent. I'll make that change as soon as possible.

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,
Susan Creighton / 703.908.5893 office

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

Hi Dillon,

I forgot to ask you to please send me screenshots of the UNI Messages you send opened up in Text format and a high level screenshot of all the responses you receive. It should look like this and don't shrink them as I need to be able to read them. I highlighted how where you need to change the format to text.

Subject: RE: AK - NMVTIS Readiness Testing

The one exception would've been the Brand Undo when change from salvage to reconstructed brand, but we're removing that as you've indicated the brand history should remain intact.

What you did is fine for the Helpdesk readiness testing. R09 passed and R13 passed. Please go ahead and execute R10. Will it be from Titling or Helpdesk? I'm showing we test R10 via Helpdesk last time.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you

Document ID: 0.7.1187.63698 DMV00027763

always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is "AITESTRECORDFORUB", and a screenshot is attached.

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

This email comes from an external source, so remember, Think Before You Click!
The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

Hi Susan,

Here are the screenshots for R09. There should be 10 total, numbered in order of occurrence. The CSOT was returned with a CSOT Undo In Progress error. I'm guessing this is expected?

Thank you,

R08 passed.

Please execute R09. This time, in addition to the screenshots you have been sending, please also send screenshots of what is displayed to the titling/helpdesk agent for the inquiry as well as each screen they enter data to or receive data back.

Thanks,
Susan Creighton / 703.908.5893 office

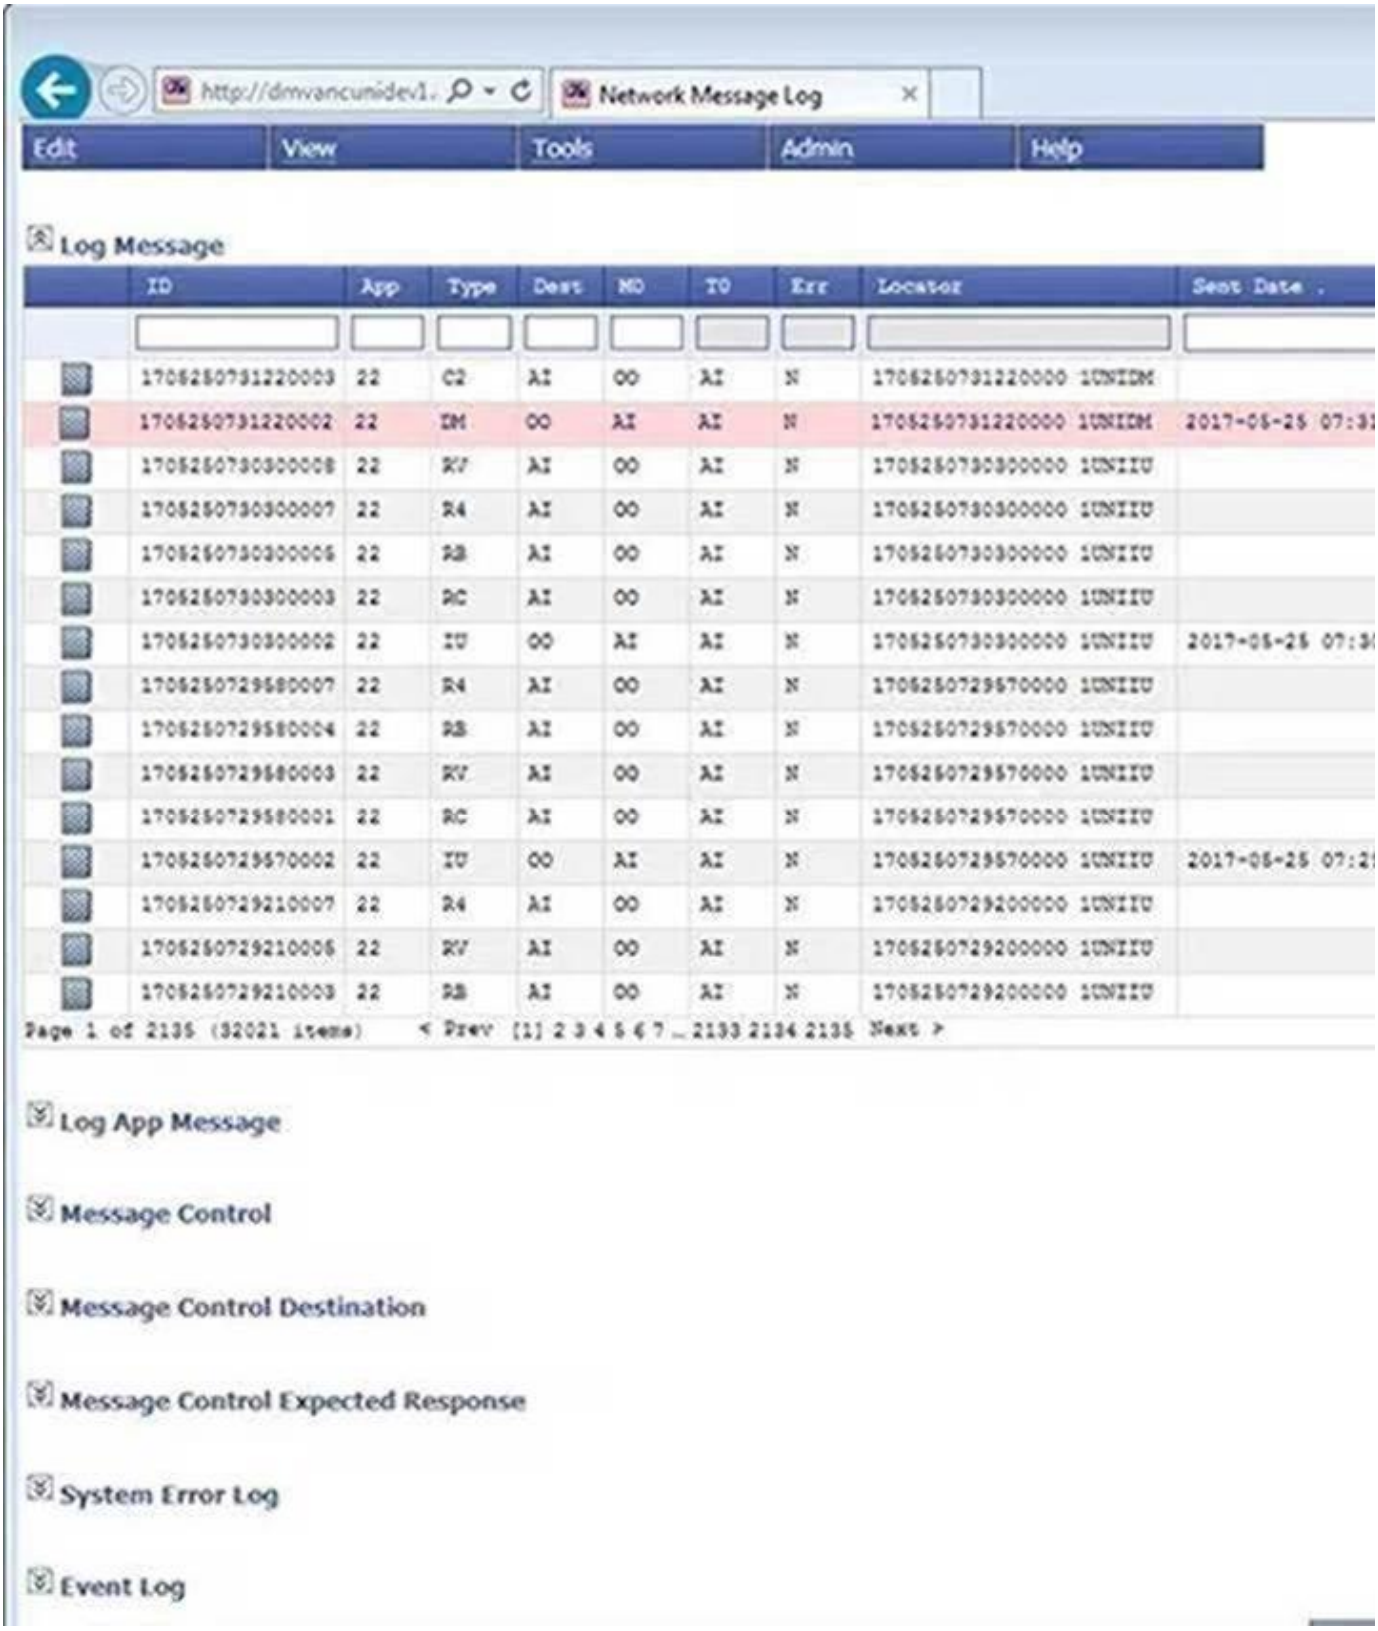
Hello Susan,

Here is R08 from the help desk. Same help desk only situation, as far as I know.

I'll e-mail David & Debra and get a confirmation for all the processes I believe are only accessible through the help desk.



Thank you,

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Here is the R05 completed using the help desk. I don't believe there's a way to perform an In-State Change Undo through the titling system.

No worries, I've reverted the change.

I managed to make in a little earlier this morning. I wouldn't mind starting on the rest of the solicited cases if you're available.

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63698 DMV00027796

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

Document ID: 0.7.1187.63698 DMV00027806

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13					
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X		
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222					
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X		
					X Denotes Exclude

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63698 DMV00027810

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Ok, so for R02A did you execute from the Helpdesk or Titling?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

Thanks,

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

Subject: RE: AK - NMVTIS Readiness Testing

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,
Susan Creighton / 703.908.5893 office

Oh, sorry. I missed excluding in on the test case plan. That means we have completed as much as we can of the readiness testing as they are still working on our access to the NICB theft system so I cannot yet validate the IT message.

In the meanwhile, would you go ahead and do the IT on the VIN that is provided and let me know if you are seeing the theft hit via your screens that are displayed to your clerks/helpdesk? I'm not sure when they will have our access working and I don't want that to hold us up.

Thanks,
Susan Creighton / 703.908.5893 office

What you did is fine for the Helpdesk readiness testing. R09 passed and R13 passed. Please go ahead and execute R10. Will it be from Titling or Helpdesk? I'm showing we test R10 via Helpdesk last time.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is "AITESTRECORDFORUB", and a screenshot is attached.

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

Hi Susan,

Here are the screenshots for R09. There should be 10 total, numbered in order of occurrence. The CSOT was returned with a CSOT Undo In Progress error. I'm guessing this is expected?

Thank you,

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Hi Dillon,

Document ID: 0.7.1187.63697 DMV00027886

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Thank you,

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2 GERAEN ERROR ELEMENT AAMVA CODE
99/2 GERAET AAMVA ERROR TYPE
99/2 GERDOC ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10
99/2 GERMTX ERROR MESSAGE TEXT

Still missing:

06/4 VVHUCC VEHICLE USE CLASS CODE (you indicated you are still working on this)
06/4 VVHNAX VEHICLE NUMBER OF AXLES

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63697 DMV00027894

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13					
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X		
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222					
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X		
					X Denotes Exclude

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63697 DMV00027908

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Subject: RE: AK - NMVTIS Readiness Testing

This email comes from an external source, so remember, Think Before You Click!

Oh, sorry. I missed excluding in on the test case plan. That means we have completed as much as we can of the readiness testing as they are still working on our access to the NICB theft system so I cannot yet validate the IT message.

In the meanwhile, would you go ahead and do the IT on the VIN that is provided and let me know if you are seeing the theft hit via your screens that are displayed to your clerks/helpdesk? I'm not sure when they will have our access working and I don't want that to hold us up.

Thanks,
Susan Creighton / 703.908.5893 office

What you did is fine for the Helpdesk readiness testing. R09 passed and R13 passed. Please go ahead and execute R10. Will it be from Titling or Helpdesk? I'm showing we test R10 via Helpdesk last time.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

Yes, I can work on it this morning. I'll re-drive the NT now.

Thanks,
Susan Creighton / 703.908.5893 office

No worries, I've reverted the change.

I managed to make in a little earlier this morning. I wouldn't mind starting on the rest of the solicited cases if you're available.

Thank you,

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

Hi Dillon,

R07 passed.

R11 has just 1 issue on the C3:

26/3 VTIPJU PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE

Thanks,
Susan Creighton / 703.908.5893 office

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

Thank you,

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Subject: RE: AK - NMVTIS Readiness Testing R06

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Thank you,

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.89517 DMV00027994

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Good morning Susan,

I'm ready to pick up where we left off Friday when you are. I've resolved the issue with the record you tested SC against.

Thank you,

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13					
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X		
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222					
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X		
					X Denotes Exclude

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.89517 DMV00028008

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

Subject: RE: AK - NMVTIS Readiness Testing

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

It's the NMVTIS menu on the mainframe. Use PF9 from the vehicle menu.

If the help desk application is indeed separate as previously indicated, I do not have access to it.

I've reach out to David for clarification, in the meantime would it be possible to continue the readiness test for the main application?

Okay, perfect. Please perform the same test using your helpdesk. We have to test that separately since it is standalone.

BTW: I Changed the subject of this email.

Thanks,

I’ve made the change so that performing a manual IU now automatically sends an IT. Please find attached new images from the UNI Web Tool.

After examining the production code I discovered that an IT is indeed supposed to be automatically sent when an IU is manually sent. I'll make that change as soon as possible.

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Okay. Everything looks good except I did not see an IT sent. Is that something you send automatically when you do inquiry or do you have to manually send it?

Thanks,
Susan Creighton / 703.908.5893 office

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,
Susan Creighton / 703.908.5893 office

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

Hi Dillon,

I forgot to ask you to please send me screenshots of the UNI Messages you send opened up in Text format and a high level screenshot of all the responses you receive. It should look like this and don't shrink them as I need to be able to read them. I highlighted how where you need to change the format to text.

Hello Susan,

I've hit my forty and it seems like we've done what we can. I'm going to take off for the day. We'll pick it up on Tuesday.

Have a great weekend!

Oh, sorry. I missed excluding in on the test case plan. That means we have completed as much as we can of the readiness testing as they are still working on our access to the NICB theft system so I cannot yet validate the IT message.

In the meanwhile, would you go ahead and do the IT on the VIN that is provided and let me know if you are seeing the theft hit via your screens that are displayed to your clerks/helpdesk? I'm not sure when they will have our access working and I don't want that to hold us up.

Thanks,
Susan Creighton / 703.908.5893 office

What you did is fine for the Helpdesk readiness testing. R09 passed and R13 passed. Please go ahead and execute R10. Will it be from Titling or Helpdesk? I'm showing we test R10 via Helpdesk last time.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is "AITESTRECORDFORUB", and a screenshot is attached.

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Anderson <panderson@resdat.com>
Subject: RE: AK - NMVTIS Readiness Testing R06

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Thank you,

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Thank you,

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Hi Dillon, thanks for the update.

Attached is the Defect Status Report that I promised I would try to have out each Friday. I am also attaching an updated Test Case Plan which denotes the test cases completed, etc. Please let me know if you have any questions.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63696 DMV00028094

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

Document ID: 0.7.1187.63696 DMV00028104

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13					
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X		
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222					
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X		
					X Denotes Exclude

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63696 DMV00028108

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

Ok, let me check the data. I have to copy our business team on all emails so I'm adding Casey.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I've hit my forty and it seems like we've done what we can. I'm going to take off for the day. We'll pick it up on Tuesday.

Have a great weekend!

This email comes from an external source, so remember, Think Before You Click!
Oh, sorry. I missed excluding in on the test case plan. That means we have completed as much as we can of the readiness testing as they are still working on our access to the NICB theft system so I cannot yet validate the IT message.

In the meanwhile, would you go ahead and do the IT on the VIN that is provided and let me know if you are seeing the theft hit via your screens that are displayed to your clerks/helpdesk? I'm not sure when they will have our access working and I don't want that to hold us up.

Thanks,
Susan Creighton / 703.908.5893 office

What you did is fine for the Helpdesk readiness testing. R09 passed and R13 passed. Please go ahead and execute R10. Will it be from Titling or Helpdesk? I'm showing we test R10 via Helpdesk last time.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

This email comes from an external source, so remember, Think Before You Click!
I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

I hope you don't mind, while I waited I went ahead and did R13 through the titling system (previous was through NMVTIS menu).

The VIN once again is "AITESTRECORDFORUB", and a screenshot is attached.

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

Hi Dillon,

R07 passed.

R11 has just 1 issue on the C3:

26/3 VTIPJU PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE

Thanks,
Susan Creighton / 703.908.5893 office

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Thank you,

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Thank you,

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63695 DMV00028192

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13					
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X		
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222					
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X		
					X Denotes Exclude

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63695 DMV00028206

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

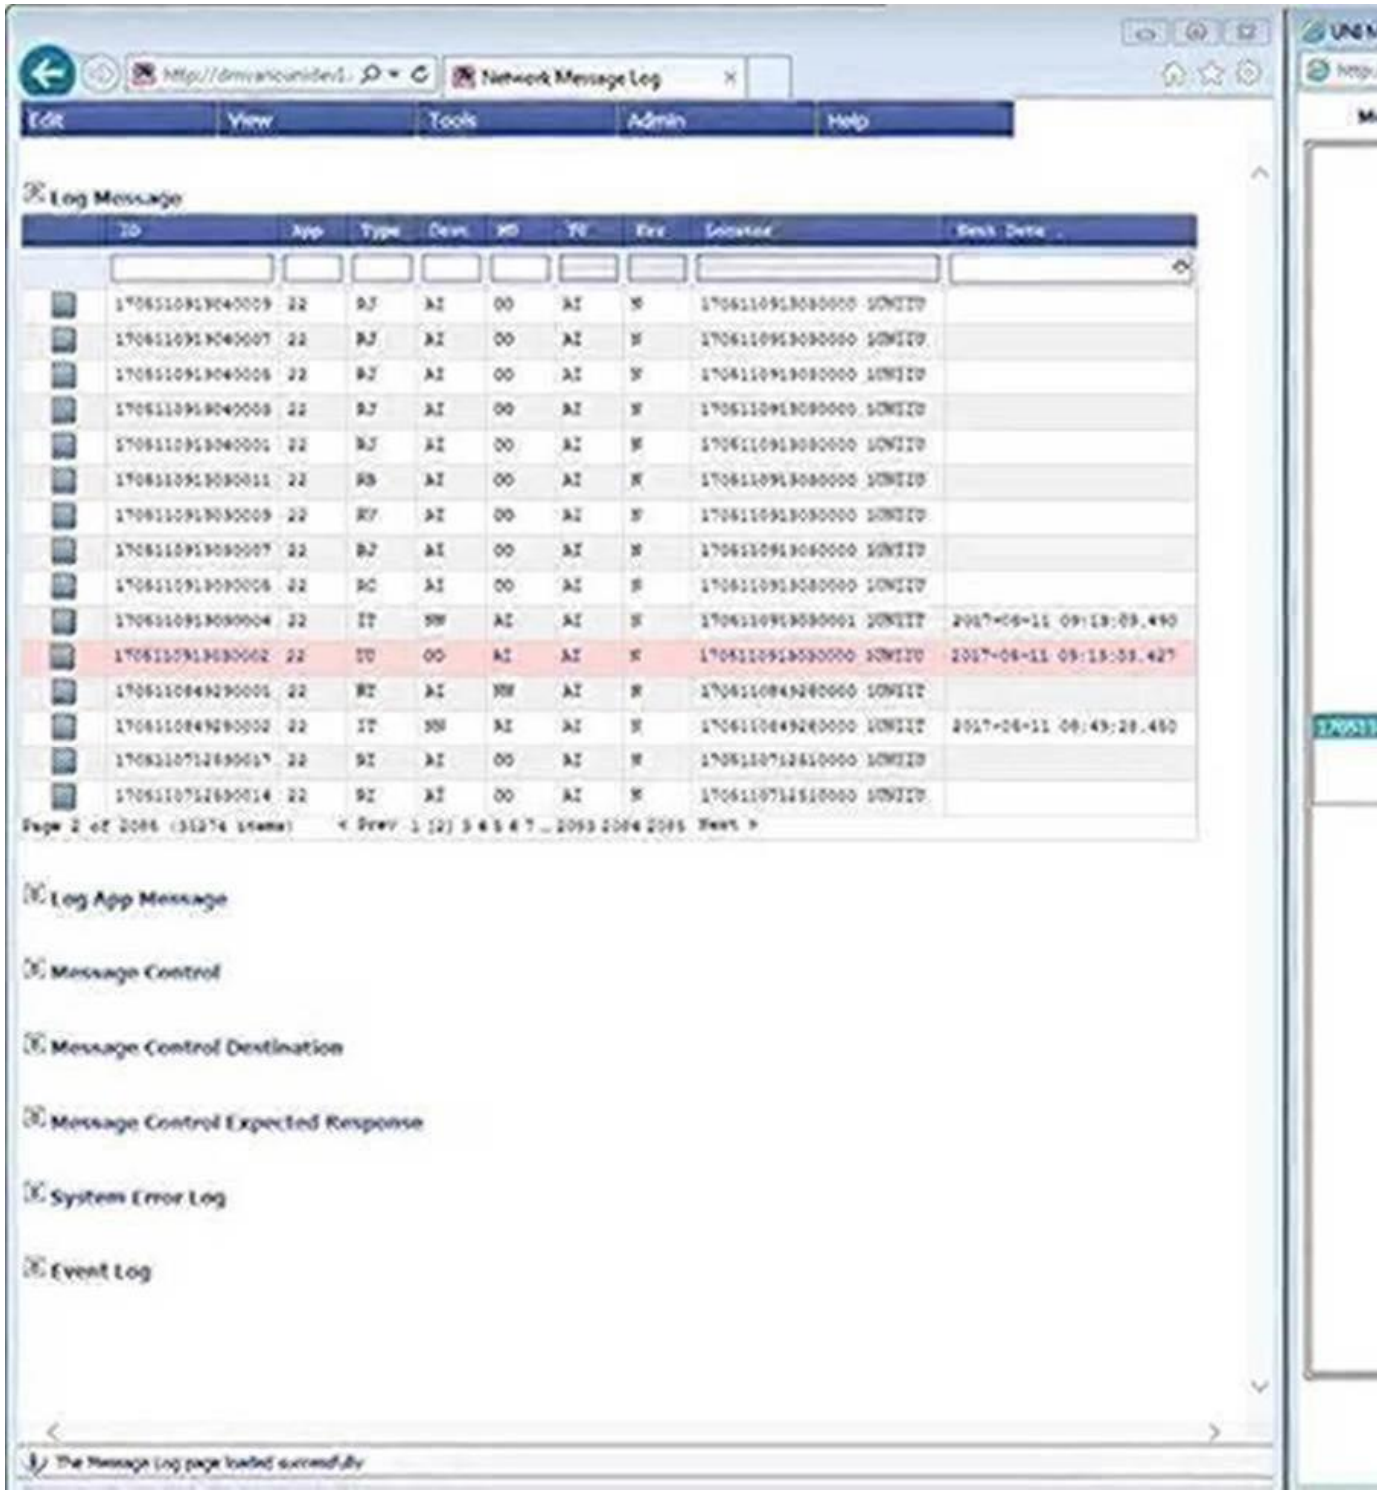
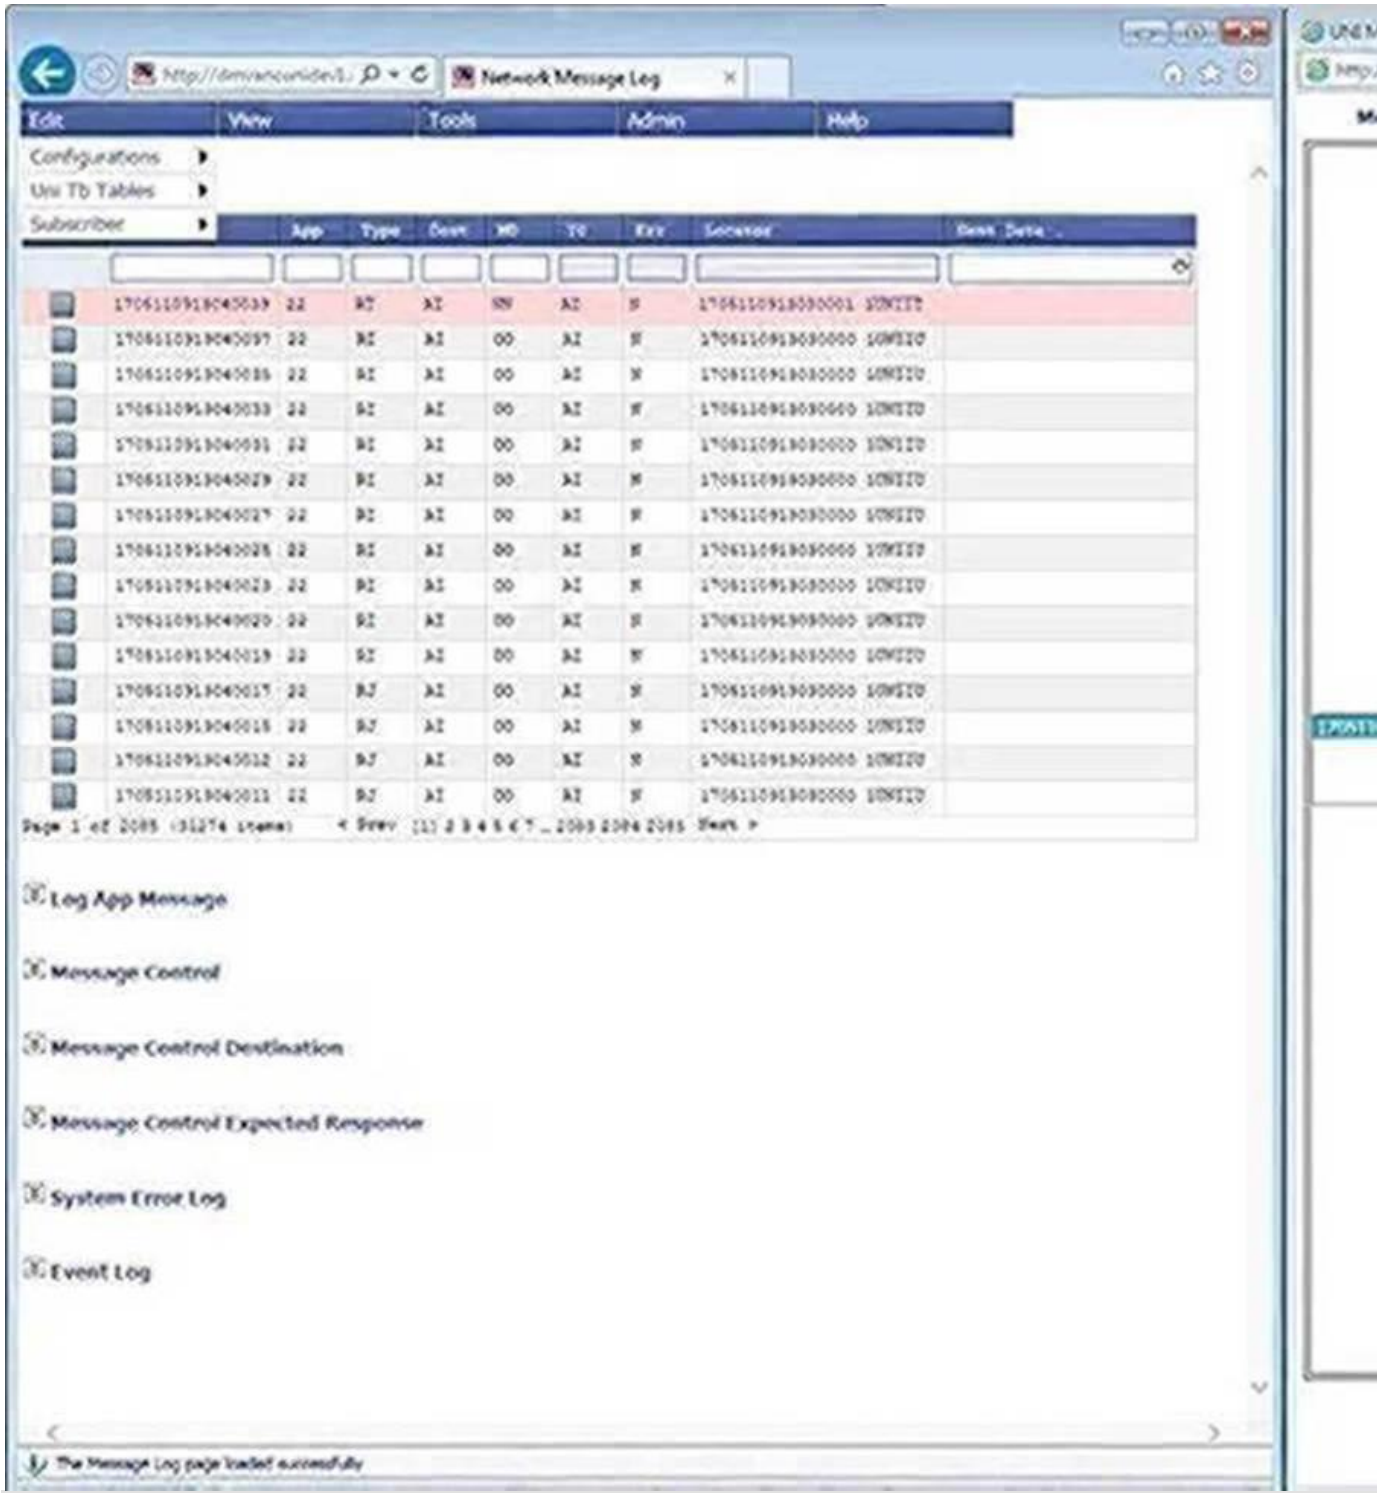
Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

Document ID: 0.7.1187.63695 DMV00028215

I’ve made the change so that performing a manual IU now automatically sends an IT. Please find attached new images from the UNI Web Tool.





From: Dillon Salsman

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

After examining the production code I discovered that an IT is indeed supposed to be automatically sent when an IU is manually sent. I'll make that change as soon as possible.

Good morning,

Thank you for including me, Dillon. Yes, please cc both David and me for UNI specific questions. If there is a business question, please also include Deborah Leonardo.

Regards,

Mina Peters
Analyst Programmer V
State of Alaska
Division of Motor Vehicles

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Okay. Everything looks good except I did not see an IT sent. Is that something you send automatically when you do inquiry or do you have to manually send it?

Thanks,
Susan Creighton / 703.908.5893 office

Understood.

Here's the first page of the log which contains rest of the RI/RJ messages.

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,
Susan Creighton / 703.908.5893 office

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

Hi Dillon,

I forgot to ask you to please send me screenshots of the UNI Messages you send opened up in Text format and a high level screenshot of all the responses you receive. It should look like this and don't shrink them as I need to be able to read them. I highlighted how where you need to change the format to text.

Hello Susan,

I've hit my forty and it seems like we've done what we can. I'm going to take off for the day. We'll pick it up on Tuesday.

Have a great weekend!

This email comes from an external source, so remember, Think Before You Click!

Oh, sorry. I missed excluding in on the test case plan. That means we have completed as much as we can of the readiness testing as they are still working on our access to the NICB theft system so I cannot yet validate the IT message.

In the meanwhile, would you go ahead and do the IT on the VIN that is provided and let me know if you are seeing the theft hit via your screens that are displayed to your clerks/helpdesk? I'm not sure when they will have our access working and I don't want that to hold us up.

Thanks,
Susan Creighton / 703.908.5893 office

What you did is fine for the Helpdesk readiness testing. R09 passed and R13 passed. Please go ahead and execute R10. Will it be from Titling or Helpdesk? I'm showing we test R10 via Helpdesk last time.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Here is the R05 completed using the help desk. I don't believe there's a way to perform an In-State Change Undo through the titling system.

Hi Dillon,

Yes, I can work on it this morning. I'll re-drive the NT now.

Thanks,
Susan Creighton / 703.908.5893 office

No worries, I've reverted the change.

I managed to make in a little earlier this morning. I wouldn't mind starting on the rest of the solicited cases if you're available.

Thank you,

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- VIN (VVHIDN) from the NT message
- SOT (VTIJUR) from the NT message
- Title Number (VTINUM) from the NT message
- The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- See Appendix A for remaining NCB and MEC (02/3) block settings
- Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

Hi Dillon,

R07 passed.

R11 has just 1 issue on the C3:

26/3 VTIPJU PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE

Thanks,
Susan Creighton / 703.908.5893 office

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Subject: RE: AK - NMVTIS Readiness Testing R06

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

Thank you,

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVIJ	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Subject: RE: AK - NMVTIS Readiness Testing R06

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Thank you,

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

D.15.36 Vehicle Use Class Code

The utilization of the vehicle.

Source of Definition: MVAs
Source Of Data: Accident report, registrant, MVA
Synonyms: Special Use, Usage Class

Value	Description	Value	Description
00	None (not in use)	08	Agriculture
01	Personal	09	Wrecker or Tow
02	Driver Training	10	Police
03	Construction/Maintenance	11	Other Business
04	Ambulance	12	Fire fighting
05	Military	13	Bus
06	Taxi	97	Other
07	Transportation of property	99	Unknown

VVHUC

Logical Format (Type/Max Length): AN/2

Format-Alpha-numeric Size=2 CLMS-VEH-USE-CLASS

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.
I mistook that parameter as being amongst the “optional” parameters you were requesting we find a way to populate.
Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Hello Susan,

Thank you for testing both cases. I’m attempting to address the issue with owner names. Meanwhile, I’m passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE There appears to be no way to support this parameter
06/4 VVHNAX VEHICLE NUMBER OF AXLES There appears to be no non-null data nor method of obtaining a non-null value

I believe I’ve addressed all other issues. I’ll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVIJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVIJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2 GERAEN ERROR ELEMENT AAMVA CODE
99/2 GERAET AAMVA ERROR TYPE
99/2 GERDOC ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10
99/2 GERMTX ERROR MESSAGE TEXT

Still missing:

06/4 VVHUCC VEHICLE USE CLASS CODE (you indicated you are still working on this)
06/4 VVHNAX VEHICLE NUMBER OF AXLES

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

Document ID: 0.7.1187.63694 DMV00028290

06/3 VVHMNA VEHICLE/VESSEL MODEL NAME – Will be set to REC to have brand 10
06/3 VVHBST VEHICLE/VESSEL BODY TYPE – From what I can tell this is supposed to map to "CP" (Coupe)? Yes

Just needed additional data.
06/3 VVHCOM VEHICLE/VESSEL MINOR COLOR - added secondary color
06/3 VVHNLN NUMBER OF ACTIVE LIENS – should have previously been 0, now 1
06/4 VVHENU VEHICLE EQUIPMENT NUMBER - added equipment number
30/6 VLHNAM LIENHOLDER - added lienholder
30/8 VLHADD LIENHOLDER ADDRESS - added lienholder
34/1 VOWNAM OWNER NAME - added additional owners

Code changes.
06/3 VVHLEI VEHICLE LEASE INDICATOR - fixed mapping
06/4 VVHNAX VEHICLE NUMBER OF AXLES - fixed mapping
06/4 VVHUL2 VEHICLE UNLADEN WEIGHT - fixed mapping
26/4 VODDTE ODOMETER DATE - was supposed to already have been mapped to title date, system doesn't ask for / obtain this information If you haven't already please check as to why this did not return the title date in this field.
30/7 VLNDAT LIEN DATE - mapped to title date, system doesn't ask for / obtain this information

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1 VBRDCD BRANDER CODE
37/1 VBRCOD BRAND CODE (2 occurrences)
37/1 VBRDAO BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.
26/3 VTIPJU PREVIOUS TITLING JURISDICTION The previous title was Alaska

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.
06/4 VVHUCC VEHICLE USE CLASS CODE This is in the online spec in Appendix D (search on use case)

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBST	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1	VOWNAM	OWNER NAME

Thanks,
Susan Creighton / 703.908.5893 office

Good morning Susan,

I'm ready to pick up where we left off Friday when you are. I've resolved the issue with the record you tested SC against.

Thank you,

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C.
In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk	
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P	
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P	

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

Document ID: 0.7.1187.63694 DMV00028300

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13					
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X		
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222					
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X		
					X Denotes Exclude

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality…but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Document ID: 0.7.1187.63694 DMV00028304

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.
The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.
The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor "implementation" of the second endpoint. I will revert the previous change I made this morning to the exist**ing** NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

Ok, I think we won't have to test it separately, but I'm checking to be sure. In the meantime, let's go ahead with R02B.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

Subject: RE: AK - NMVTIS Readiness Testing

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

It's the NMVTIS menu on the mainframe. Use PF9 from the vehicle menu.

If the help desk application is indeed separate as previously indicated, I do not have access to it.

I've reach out to David for clarification, in the meantime would it be possible to continue the readiness test for the main application?

Okay, perfect. Please perform the same test using your helpdesk. We have to test that separately since it is standalone.

BTW: I Changed the subject of this email.

Thanks,

I’ve made the change so that performing a manual IU now automatically sends an IT. Please find attached new images from the UNI Web Tool.

After examining the production code I discovered that an IT is indeed supposed to be automatically sent when an IU is manually sent. I'll make that change as soon as possible.

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Okay. Everything looks good except I did not see an IT sent. Is that something you send automatically when you do inquiry or do you have to manually send it?

Thanks,
Susan Creighton / 703.908.5893 office

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,
Susan Creighton / 703.908.5893 office

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

Hi Dillon,

I forgot to ask you to please send me screenshots of the UNI Messages you send opened up in Text format and a high level screenshot of all the responses you receive. It should look like this and don't shrink them as I need to be able to read them. I highlighted how where you need to change the format to text.

OUR EVENTS

AAMVA AIC 2017 - Online Registration Now Open

Registration is now open for the 2017 Annual International Conference, August 21-23, in San Francisco, California! Register online today and start planning your trip. Check out the program-at-a-glance and register here. All conference sessions will take place at the historic Hyatt Regency hotel at the Embarcadero Center. Click here for more information and to book your reservations. Visit the 2017 Annual International Conference website for full information and to register today!

System Modernization Best Practices on AAMVA.org

Visit AAMVA.org to download our newest best practices document, System Modernization Best Practices. While the system modernization project failures and successes of many public organizations are well-documented, motor vehicle administrations' participation in legacy modernizations has up until now been largely undocumented. AAMVA's System Modernization Working Group is pleased to present this resource document that provides a unique look into the inner workings of a motor vehicle administration system modernization project. Drawing on expertise in motor vehicle agencies and industry, the System Modernization Best Practices document aims to provide a roadmap to assist those in or about to begin their modernization journey. Download the document here and visit the new System Modernization page on the AAMVA website for more information and resources.

Time Running Out For PA To Comply With Federal REAL ID Law

The Pennsylvania Legislature is pushing against a deadline set by the federal government to comply with new standards for more secure drivers' licenses. Read the article in tribdem.com.

Pennsylvania Transportation Exec Leaving for Contractor Job

A Pennsylvania Department of Transportation official who's overseen billions of dollars' worth of road projects in the Pittsburgh area is leaving to take a job with a major contractor. Read the article in usnews.com.

State Senators Plan Bill That Would Ban Cellphone Use For Drivers Younger Than 18

The two highest-ranking members of the state Senate Transportation Committee vowed Tuesday to propose a bill soon that would make it illegal for 16- and 17-year-old drivers to use cellphones while driving. Read the article in readingeagle.com.

Report: PA Distracted Driving Citations Climbed 52 Percent in Two Years

Distracted driving citations rose by 52 percent in Pennsylvania between 2014 and 2016, according to a new analysis of court records. Read the article in phillymag.com.

REGION II NEWS

Driverless Cars In Central Florida

The federal government has designated Central Florida as a testing ground for autonomous cars. So how far off into the future is the fully driverless vehicle? Read the article in wmfe.org.

Lawmakers Push Bills to Regulate Driverless Cars (Louisiana)

Eating and driving is a popular but dangerous habitSelf-driving cars are coming, and Louisiana wants to be ready. A group of lawmakers has brought forth legislation to prepare for self-driving cars in Louisiana and to begin the process of regulating them. Read the article on gallowayjefcoat.com.

NC REAL ID Driver Licenses Surpass Milestone

The N.C. Division of Motor Vehicles has issued more than 10,000 REAL ID driver licenses and identification cards since debuting the new card on May 1, DMV officials said Monday. Read the article in charlotteobserver.com.

Texas House Tentatively Approves Testing of Driverless Cars in the State

Texas House lawmakers on Saturday embraced one transportation future, driverless cars, while displaying wariness if not outright hostility toward another, bullet trains. Read the article in govtech.com.

Virginia DMV Developing a New ID for Travel and Federal Access

The Virginia Department of Motor Vehicles is getting ahead of upcoming federal rules. In a few years, the U.S. Department of Homeland Security will require all Americans use a federally-approved credential in order to board domestic flights in the United States. Read the article in nbc29.com.

Open RFP's will be included in AAMVA's Regional News and The Week In Review newsletters to provide maximum exposure for jurisdictional procurements.

Iowa Smartphone Driver's Licenses Expected to Launch in 2018

Can't find your ID? Check your phone. Iowans should be able to start downloading their driver's licenses onto smartphones in about 12 to 18 months, according to the Iowa Department of Transportation. Read the article in desmoinesregister.com.

Highway Signs to be Dedicated In Honor of Fallen Highway Patrol Troopers (South Dakota)

Highway signs will be dedicated next week as part of National Police Week – a different sign dedicated each day -- in honor of the five South Dakota Highway Patrol troopers who have died in the line of duty. Read the press release.

REGION IV NEWS

Route 66 License Plate Named Tops In the Nation

Flagstaff, Arizona, don't forget Winona... Kingman..." Arizona figures prominently in the lyrics to the iconic pop song celebrating the highway known as the "Mother Road." Now Arizona gets even more attention because the new Route 66 specialty license plate has been named the Best New License Plate in the U.S. Read the press release.

California DMV Rejects License Plates With Profane, Vulgar or Racist Meanings

Some California Department of Motor Vehicles workers have to keep their minds in the gutter all day long. Their job is to catch vanity license plate requests that don't meet the state's rules of decency. Sexual suggestions, hints of vulgarity or possible gang references earn a "no." Only plates that are pure win a "yes" from the DMV reviewers – and they don't take risks. Read the article in sacbeee.com.

Nevada Commits to Bring Organ and Tissue Donation Education to High Schools

The passage of SB112, proposed by Donor Network West, will result in youth understanding the life-giving benefits of organ and tissue donation that can save and heal a life of someone in need. Read the article in benzinga.com.

Birth Certificate Changes Rise Following Real ID Act (New Mexico)

The New Mexico Bureau of Vital Records and Health Statistics is experiencing a large demand for birth certificate services following the implementation of the Real ID Act. Read the article in daily-times.com.

Oregon May Become the First State To Offer Non-Binary Option On IDs

Last June, a Multnomah County Court judge in Oregon made Jamie Shupe the first legally non-binary person in the U.S., identifying with a gender that is neither male nor female. Read the article in pbs.org.

Distracted Drivers Cause More Collisions, Injuries Than Drunk Drivers: SGI

Although impaired drivers cause more fatalities on Saskatchewan roads than any other group, drivers using their cellphones are responsible for far more injuries and represent the leading cause of collisions across the province. Read the article in panow.com.

OTHER NEWS

The Future Of the Car: An Autocar Guide

Whether it's new powertrains, in-car technology or self-driving cars, automotive

Document ID: 0.7.1187.63686 DMV00028390

technology is advancing at an incredible rate. New technology and systems are reinventing many of the fundamentals of the car, and the motoring landscape is going to change forever as a result. Read the article in autocar.co.uk.

GHSA and The National Road Safety Foundation Provide $60,000 to Support State Drowsy Driving Prevention Efforts

The Governors Highway Safety Association (GHSA) and The National Road Safety Foundation (NRSF) are pleased to announce four states will receive grants to implement innovative drowsy driving prevention campaigns. Iowa, Maryland, Nevada and Tennessee will each receive $15,000 in funding. Twelve states applied for these grants. A panel of drowsy driving experts carefully reviewed all applications against a number of criteria and selected the winners. Read the article in prnewswire.com.

Driver Fatalities Prompt Federal Review of Certain Guardrails

Federal authorities take a second look at some guardrails you might pass daily. The death of drivers has prompted the federal review. It's a review Maryland drivers stand to be impacted by since the state ranks fourth in having the highest number of Lindsay X-Lite end treatments on its guardrails. Only three states have more of them. Read the article in foxbaltimore.com.

How Technology Could Change the DMV: Mobile Driver's Licenses, Cars That Issue Speeding Tickets and More

Technology has disrupted and changed a variety of industries and experiences, but most wouldn't put a trip to the DMV in the category of modernized experiences. Read the article at geekwire.com.

AAMVA AIC 2017 - Online Registration Now Open

Registration is now open for the 2017 Annual International Conference, August 21-23, in San Francisco, California! Register online today and start planning your trip. Check out the program-at-a-glance and register here. All conference sessions will take place at the historic Hyatt Regency hotel at the Embarcadero Center. Click here for more information and to book your reservations. Visit the 2017 Annual International Conference website for full information and to register today!

System Modernization Best Practices on AAMVA.org

Visit AAMVA.org to download our newest best practices document, System Modernization Best Practices. While the system modernization project failures and successes of many public organizations are well-documented, motor vehicle administrations' participation in legacy modernizations has up until now been largely undocumented. AAMVA's System Modernization Working Group is pleased to present this resource document that provides a unique look into the inner workings of a motor vehicle administration system modernization project. Drawing on expertise in motor vehicle agencies and industry, the System Modernization Best Practices document aims to provide a roadmap to assist those in or about to begin their modernization journey. Download the document here and visit the new System Modernization page on the AAMVA website for more information and resources.

Open RFP's will be included in AAMVA's Regional News and The Week In Review newsletters to provide maximum exposure for jurisdictional procurements.

Iowa Smartphone Driver's Licenses Expected to Launch in 2018

Can't find your ID? Check your phone. Iowans should be able to start downloading their driver's licenses onto smartphones in about 12 to 18 months, according to the Iowa Department of Transportation. Read the article in desmoinesregister.com.

Highway Signs to be Dedicated In Honor of Fallen Highway Patrol Troopers (South Dakota)

Highway signs will be dedicated next week as part of National Police Week – a different sign dedicated each day -- in honor of the five South Dakota Highway Patrol troopers who have died in the line of duty. Read the press release.

REGION IV NEWS

Route 66 License Plate Named Tops In the Nation

Flagstaff, Arizona, don't forget Winona... Kingman..." Arizona figures prominently in the lyrics to the iconic pop song celebrating the highway known as the "Mother Road." Now Arizona gets even more attention because the new Route 66 specialty license plate has been named the Best New License Plate in the U.S. Read the press release.

California DMV Rejects License Plates With Profane, Vulgar or Racist Meanings

Some California Department of Motor Vehicles workers have to keep their minds in the gutter all day long. Their job is to catch vanity license plate requests that don't meet the state's rules of decency. Sexual suggestions, hints of vulgarity or possible gang references earn a "no." Only plates that are pure win a "yes" from the DMV reviewers – and they don't take risks. Read the article in sacbeee.com.

Nevada Commits to Bring Organ and Tissue Donation Education to High Schools

The passage of SB112, proposed by Donor Network West, will result in youth understanding the life-giving benefits of organ and tissue donation that can save and heal a life of someone in need. Read the article in benzinga.com.

Birth Certificate Changes Rise Following Real ID Act (New Mexico)

The New Mexico Bureau of Vital Records and Health Statistics is experiencing a large demand for birth certificate services following the implementation of the Real ID Act. Read the article in daily-times.com.

Oregon May Become the First State To Offer Non-Binary Option On IDs

Last June, a Multnomah County Court judge in Oregon made Jamie Shupe the first legally non-binary person in the U.S., identifying with a gender that is neither male nor female. Read the article in pbs.org.

Distracted Drivers Cause More Collisions, Injuries Than Drunk Drivers: SGI

Although impaired drivers cause more fatalities on Saskatchewan roads than any other group, drivers using their cellphones are responsible for far more injuries and represent the leading cause of collisions across the province. Read the article in panow.com.

OTHER NEWS

The Future Of the Car: An Autocar Guide

Whether it's new powertrains, in-car technology or self-driving cars, automotive

Document ID: 0.7.1187.63684 DMV00028396

technology is advancing at an incredible rate. New technology and systems are reinventing many of the fundamentals of the car, and the motoring landscape is going to change forever as a result. Read the article in autocar.co.uk.

GHSA and The National Road Safety Foundation Provide $60,000 to Support State Drowsy Driving Prevention Efforts

The Governors Highway Safety Association (GHSA) and The National Road Safety Foundation (NRSF) are pleased to announce four states will receive grants to implement innovative drowsy driving prevention campaigns. Iowa, Maryland, Nevada and Tennessee will each receive $15,000 in funding. Twelve states applied for these grants. A panel of drowsy driving experts carefully reviewed all applications against a number of criteria and selected the winners. Read the article in prnewswire.com.

Driver Fatalities Prompt Federal Review of Certain Guardrails

Federal authorities take a second look at some guardrails you might pass daily. The death of drivers has prompted the federal review. It's a review Maryland drivers stand to be impacted by since the state ranks fourth in having the highest number of Lindsay X-Lite end treatments on its guardrails. Only three states have more of them. Read the article in foxbaltimore.com.

How Technology Could Change the DMV: Mobile Driver's Licenses, Cars That Issue Speeding Tickets and More

Technology has disrupted and changed a variety of industries and experiences, but most wouldn't put a trip to the DMV in the category of modernized experiences. Read the article at geekwire.com.

AAMVA AIC 2017 - Online Registration Now Open

Registration is now open for the 2017 Annual International Conference, August 21-23, in San Francisco, California! Register online today and start planning your trip. Check out the program-at-a-glance and register here. All conference sessions will take place at the historic Hyatt Regency hotel at the Embarcadero Center. Click here for more information and to book your reservations. Visit the 2017 Annual International Conference website for full information and to register today!

System Modernization Best Practices on AAMVA.org

Visit AAMVA.org to download our newest best practices document, System Modernization Best Practices. While the system modernization project failures and successes of many public organizations are well-documented, motor vehicle administrations' participation in legacy modernizations has up until now been largely undocumented. AAMVA's System Modernization Working Group is pleased to present this resource document that provides a unique look into the inner workings of a motor vehicle administration system modernization project. Drawing on expertise in motor vehicle agencies and industry, the System Modernization Best Practices document aims to provide a roadmap to assist those in or about to begin their modernization journey. Download the document here and visit the new System Modernization page on the AAMVA website for more information and resources.

AAMVA AIC 2017 - Online Registration Now Open

Registration is now open for the 2017 Annual International Conference, August 21-23, in San Francisco, California! Register online today and start planning your trip. Check out the program-at-a-glance and register here. All conference sessions will take place at the historic Hyatt Regency hotel at the Embarcadero Center. Click here for more information and to book your reservations. Visit the 2017 Annual International Conference website for full information and to register today!

System Modernization Best Practices on AAMVA.org

Visit AAMVA.org to download our newest best practices document, System Modernization Best Practices. While the system modernization project failures and successes of many public organizations are well-documented, motor vehicle administrations' participation in legacy modernizations has up until now been largely undocumented. AAMVA's System Modernization Working Group is pleased to present this resource document that provides a unique look into the inner workings of a motor vehicle administration system modernization project. Drawing on expertise in motor vehicle agencies and industry, the System Modernization Best Practices document aims to provide a roadmap to assist those in or about to begin their modernization journey. Download the document here and visit the new System Modernization page on the AAMVA website for more information and resources.

Time Running Out For PA To Comply With Federal REAL ID Law

The Pennsylvania Legislature is pushing against a deadline set by the federal government to comply with new standards for more secure drivers' licenses. Read the article in tribdem.com.

Pennsylvania Transportation Exec Leaving for Contractor Job

A Pennsylvania Department of Transportation official who's overseen billions of dollars' worth of road projects in the Pittsburgh area is leaving to take a job with a major contractor. Read the article in usnews.com.

State Senators Plan Bill That Would Ban Cellphone Use For Drivers Younger Than 18

The two highest-ranking members of the state Senate Transportation Committee vowed Tuesday to propose a bill soon that would make it illegal for 16- and 17-year-old drivers to use cellphones while driving. Read the article in readingeagle.com.

Report: PA Distracted Driving Citations Climbed 52 Percent in Two Years

Distracted driving citations rose by 52 percent in Pennsylvania between 2014 and 2016, according to a new analysis of court records. Read the article in phillymag.com.

REGION II NEWS

Driverless Cars In Central Florida

The federal government has designated Central Florida as a testing ground for autonomous cars. So how far off into the future is the fully driverless vehicle? Read the article in wmfe.org.

Lawmakers Push Bills to Regulate Driverless Cars (Louisiana)

Eating and driving is a popular but dangerous habitSelf-driving cars are coming, and Louisiana wants to be ready. A group of lawmakers has brought forth legislation to prepare for self-driving cars in Louisiana and to begin the process of regulating them. Read the article on gallowayjefcoat.com.

NC REAL ID Driver Licenses Surpass Milestone

The N.C. Division of Motor Vehicles has issued more than 10,000 REAL ID driver licenses and identification cards since debuting the new card on May 1, DMV officials said Monday. Read the article in charlotteobserver.com.

Texas House Tentatively Approves Testing of Driverless Cars in the State

Texas House lawmakers on Saturday embraced one transportation future, driverless cars, while displaying wariness if not outright hostility toward another, bullet trains. Read the article in govtech.com.

Virginia DMV Developing a New ID for Travel and Federal Access

The Virginia Department of Motor Vehicles is getting ahead of upcoming federal rules. In a few years, the U.S. Department of Homeland Security will require all Americans use a federally-approved credential in order to board domestic flights in the United States. Read the article in nbc29.com.

(Proposals due June 28, 2017)

Post your open RFPs/RFIs on AAMVA's Web site at www.aamva.org/open-rfps/.

Open RFP's will be included in AAMVA's Regional News and The Week In Review newsletters to provide maximum exposure for jurisdictional procurements.

Iowa Smartphone Driver's Licenses Expected to Launch in 2018

Can't find your ID? Check your phone. Iowans should be able to start downloading their driver's licenses onto smartphones in about 12 to 18 months, according to the Iowa Department of Transportation. Read the article in desmoinesregister.com.

Highway Signs to be Dedicated In Honor of Fallen Highway Patrol Troopers (South Dakota)

Highway signs will be dedicated next week as part of National Police Week – a different sign dedicated each day -- in honor of the five South Dakota Highway Patrol troopers who have died in the line of duty. Read the press release.

REGION IV NEWS

Route 66 License Plate Named Tops In the Nation

Flagstaff, Arizona, don't forget Winona... Kingman..." Arizona figures prominently in the lyrics to the iconic pop song celebrating the highway known as the "Mother Road." Now Arizona gets even more attention because the new Route 66 specialty license plate has been named the Best New License Plate in the U.S. Read the press release.

California DMV Rejects License Plates With Profane, Vulgar or Racist Meanings

Some California Department of Motor Vehicles workers have to keep their minds in the gutter all day long. Their job is to catch vanity license plate requests that don't meet the state's rules of decency. Sexual suggestions, hints of vulgarity or possible gang references earn a "no." Only plates that are pure win a "yes" from the DMV reviewers – and they don't take risks. Read the article in sacbeee.com.

Nevada Commits to Bring Organ and Tissue Donation Education to High Schools

The passage of SB112, proposed by Donor Network West, will result in youth understanding the life-giving benefits of organ and tissue donation that can save and heal a life of someone in need. Read the article in benzinga.com.

Birth Certificate Changes Rise Following Real ID Act (New Mexico)

The New Mexico Bureau of Vital Records and Health Statistics is experiencing a large demand for birth certificate services following the implementation of the Real ID Act. Read the article in daily-times.com.

Oregon May Become the First State To Offer Non-Binary Option On IDs

Last June, a Multnomah County Court judge in Oregon made Jamie Shupe the first legally non-binary person in the U.S., identifying with a gender that is neither male nor female. Read the article in pbs.org.

Distracted Drivers Cause More Collisions, Injuries Than Drunk Drivers: SGI

Although impaired drivers cause more fatalities on Saskatchewan roads than any other group, drivers using their cellphones are responsible for far more injuries and represent the leading cause of collisions across the province. Read the article in panow.com.

Subject: R-IV Conference

Attachments: 5-24-17 R-IV Reg List - ALL.xlsx; 5-29-17 R-IV AAMVA Staff Reg List.pdf; 5-29-17 R-IV Federal Reg List.pdf; 5-29-17 R-IV Guest Reg List.pdf; 5-29-17 R-IV Industry Reg List.pdf; 5-29-17 R-IV Juris Reg List.pdf

Hello Region IV Conference Participants,

On behalf of Past President Pat Kohler, thanks for joining us in Seattle last week for this year's Region IV conference. We hope you enjoyed the conference and found it worthy of your time.

Attached are registration lists for conference attendees. The Excel spreadsheet contains information for all attendees. The .pdf documents list jurisdictional, industry, guests, federal representatives and AAMVA staff.

Presentations will be posted to the AAMVA website soon.

On a personal note, thanks so much for the great send-off to retirement! I can't imagine a more perfect evening. It is one I will never forget. I mean how many people have sat on a baby grand piano with dozens of handsome men singing "She's Lost That Loving Feeling" to them? I was humbled to receive your kind words and kindnesses. I will miss my AAMVA family and wish you all the best, both personally and professionally. Be happy, healthy and safe!!

Thanks again!

Sheila
